

Occhio

Occhio

light is evolution

In the beginning, there was light, and light is evolution.
An evolution that is creative, that constantly renews itself
and that will never end. Light means life. Light quality
means quality of life!

light is atmosphere

Our intelligent light solutions will perfectly meet your individual needs. It will give you joy to deal with light intuitively and playfully. With the help of Occhio, you will become the lighting designer in your home.

A man with a beard, wearing a teal shirt and light-colored trousers, is reclining in a modern wooden armchair with a black leather seat and backrest. He is holding an open book and looking towards a large floor-to-ceiling window on the left. The window looks out onto a dark, wooded area at night. The room has a minimalist aesthetic with a concrete ceiling, a tall bookshelf filled with books, and a large, colorful patterned rug. A tall, thin floor lamp with a black base and a white adjustable head is positioned to the right of the man, casting a warm glow. The overall atmosphere is calm and sophisticated.

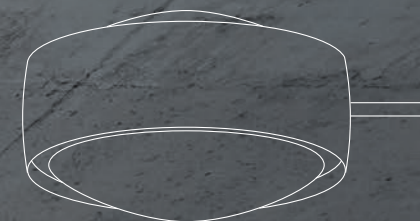

light is quality

When aesthetics and technology, ratio and emotion become one, we have achieved our goal. The careful attention to detail and the joy of perfect functionality immediately envelope you when you come in contact with Occhio.

L series

Design meets innovation – the modular luminaire and spotlight system Sento and Più offer the right light for every situation. Its comprehensive design, the extensive system architecture and the unique lighting quality create perfect conditions for holistic lighting design.

House Lumar, Wien: lighting design from a single cast – In this open architect's house the luminaire systems Sento and Più provide for basic lighting and gentle accent light. A special highlight is the double flam Sento sospeso suspended luminaire above the dining table, which allows completely different, fascinating light scenes with seperately controlled up- and downlight.

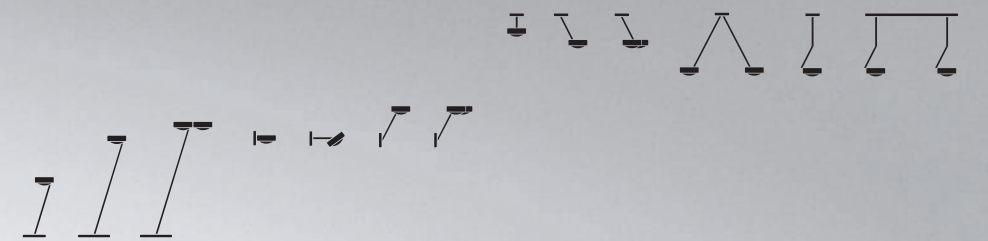

Gaggenau Showroom, London: pure aesthetics and timeless design –
In the spacious rooms, the Più spotlight system puts sculptural installations and high-quality materials by the brand manufacturer Gaggenau. Used as a recessed and trackversion, Più creates the right light for cooking, working and presenting.

Martin et Karczinski GmbH, Munich: perfect light for creative work – While Più recessed and surface mount spotlights provide for the basic lighting of the working islands, the Più RS floor spotlights offer maximum freedom of design: whether as accent lighting or as directional table lighting, the Più RS floor spotlights open up a new class of room lighting.

Sento

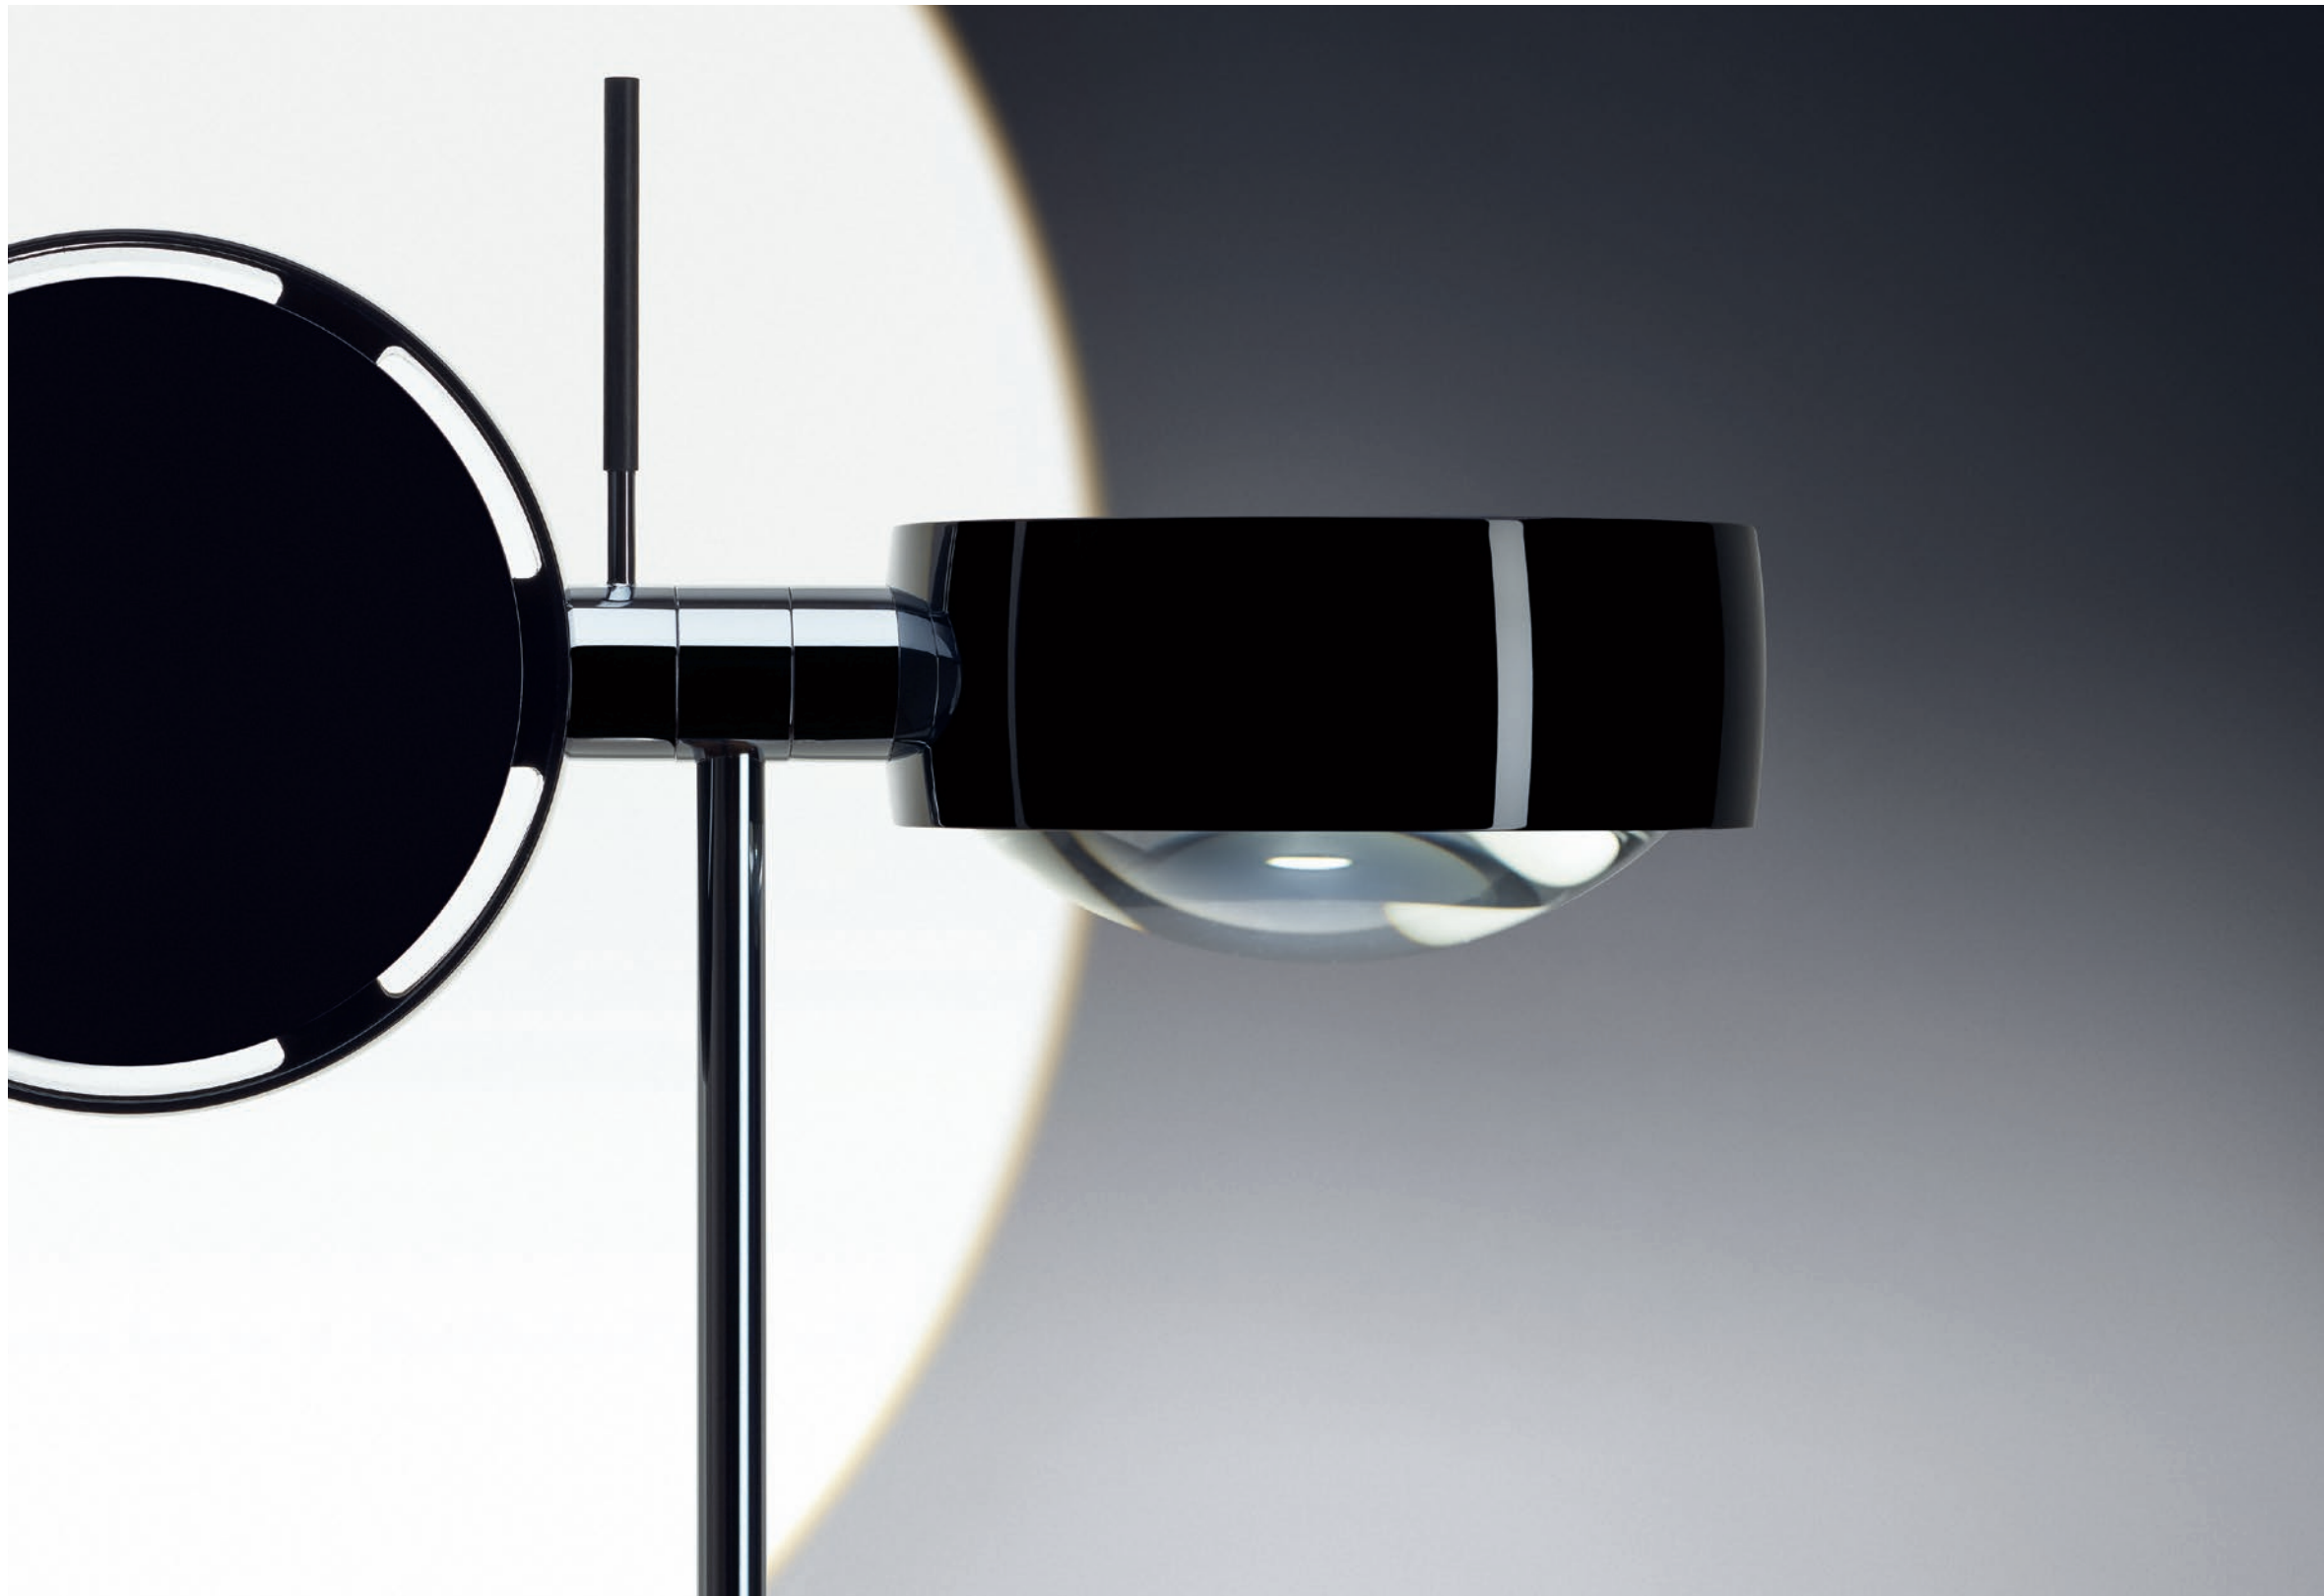

The innovative, modular luminaire system
for residential and public areas

Design Axel Meise, Christoph Kügler

Sento

the innovative, modulare luminaire system

With Sento, you can exactly define the light – and thus compose your own design message. Sento is modular and multifaceted. And it can be used both for residential and public settings.

choose your light – single-sided or double-sided luminaire heads, changeable inserts for individual lighting effects and a selection of different LED light colors allow for a precise adjustment of the desired light to every situation. While offering the best color rendering (CRI 97) and highest efficiency.

Occhio air – the intuitive Bluetooth-control, directly integrated in the head (optional).

Sento

table and floor luminaires – features

Perfect light answers. If you touch the light of Sento it is switched, dimmed and directed in the room. This creates fascinating moments – thanks to a sensor which perfectly understands people.

touchless control – with the help of »touchless control« Sento can be switched, dimmed or faded with simple gestures – touchlessly and intuitively thanks to innovative infrared sensors.

two in one – Sento with its double-sided light output is equipped with two LED chips. As a result, uplight and downlight can be operated independently of each other.

up/down fading – a unique feature: Via gesture control, the full light output can be drawn from one side to the other.

Occhio air – the intuitive Bluetooth-control, directly integrated in the head (optional).

Sento terra

180 cm, base ø 32 cm, body 360° rotatable
(can be fixed), 12° adjustable, head 360° rotatable,
2x26W/2x18W, controllable via »touchless control«
(at the head), controller and Occhio air

One luminaire, unlimited possibilities: Sento terra provides you with two independently adjustable luminaire heads – and infinite freedom in design as a result.

Sento

wall and ceiling luminaires

Sento

wall and ceiling luminaires – features

up/down presetting for double-sided wall and ceiling luminaires – any desired ratio of uplight and downlight can be set and saved in five stages via the »step« function – with full overall output. You can then dim uplight and downlight together – on the basis of the stored settings! This way several luminaires in a room can simply and precisely coordinated with each other.

up/down fading – with the help of Occhio air, the entire light output can be drawn from one side to the other continuously: a unique experience.

Occhio air – the intuitive Bluetooth-control, directly integrated in the head (optional).

Sento adapts itself perfectly to you. It begins with your personal preference, your desired ratio of uplight to downlight – and your mise-en-scène can start.

Sento sospeso

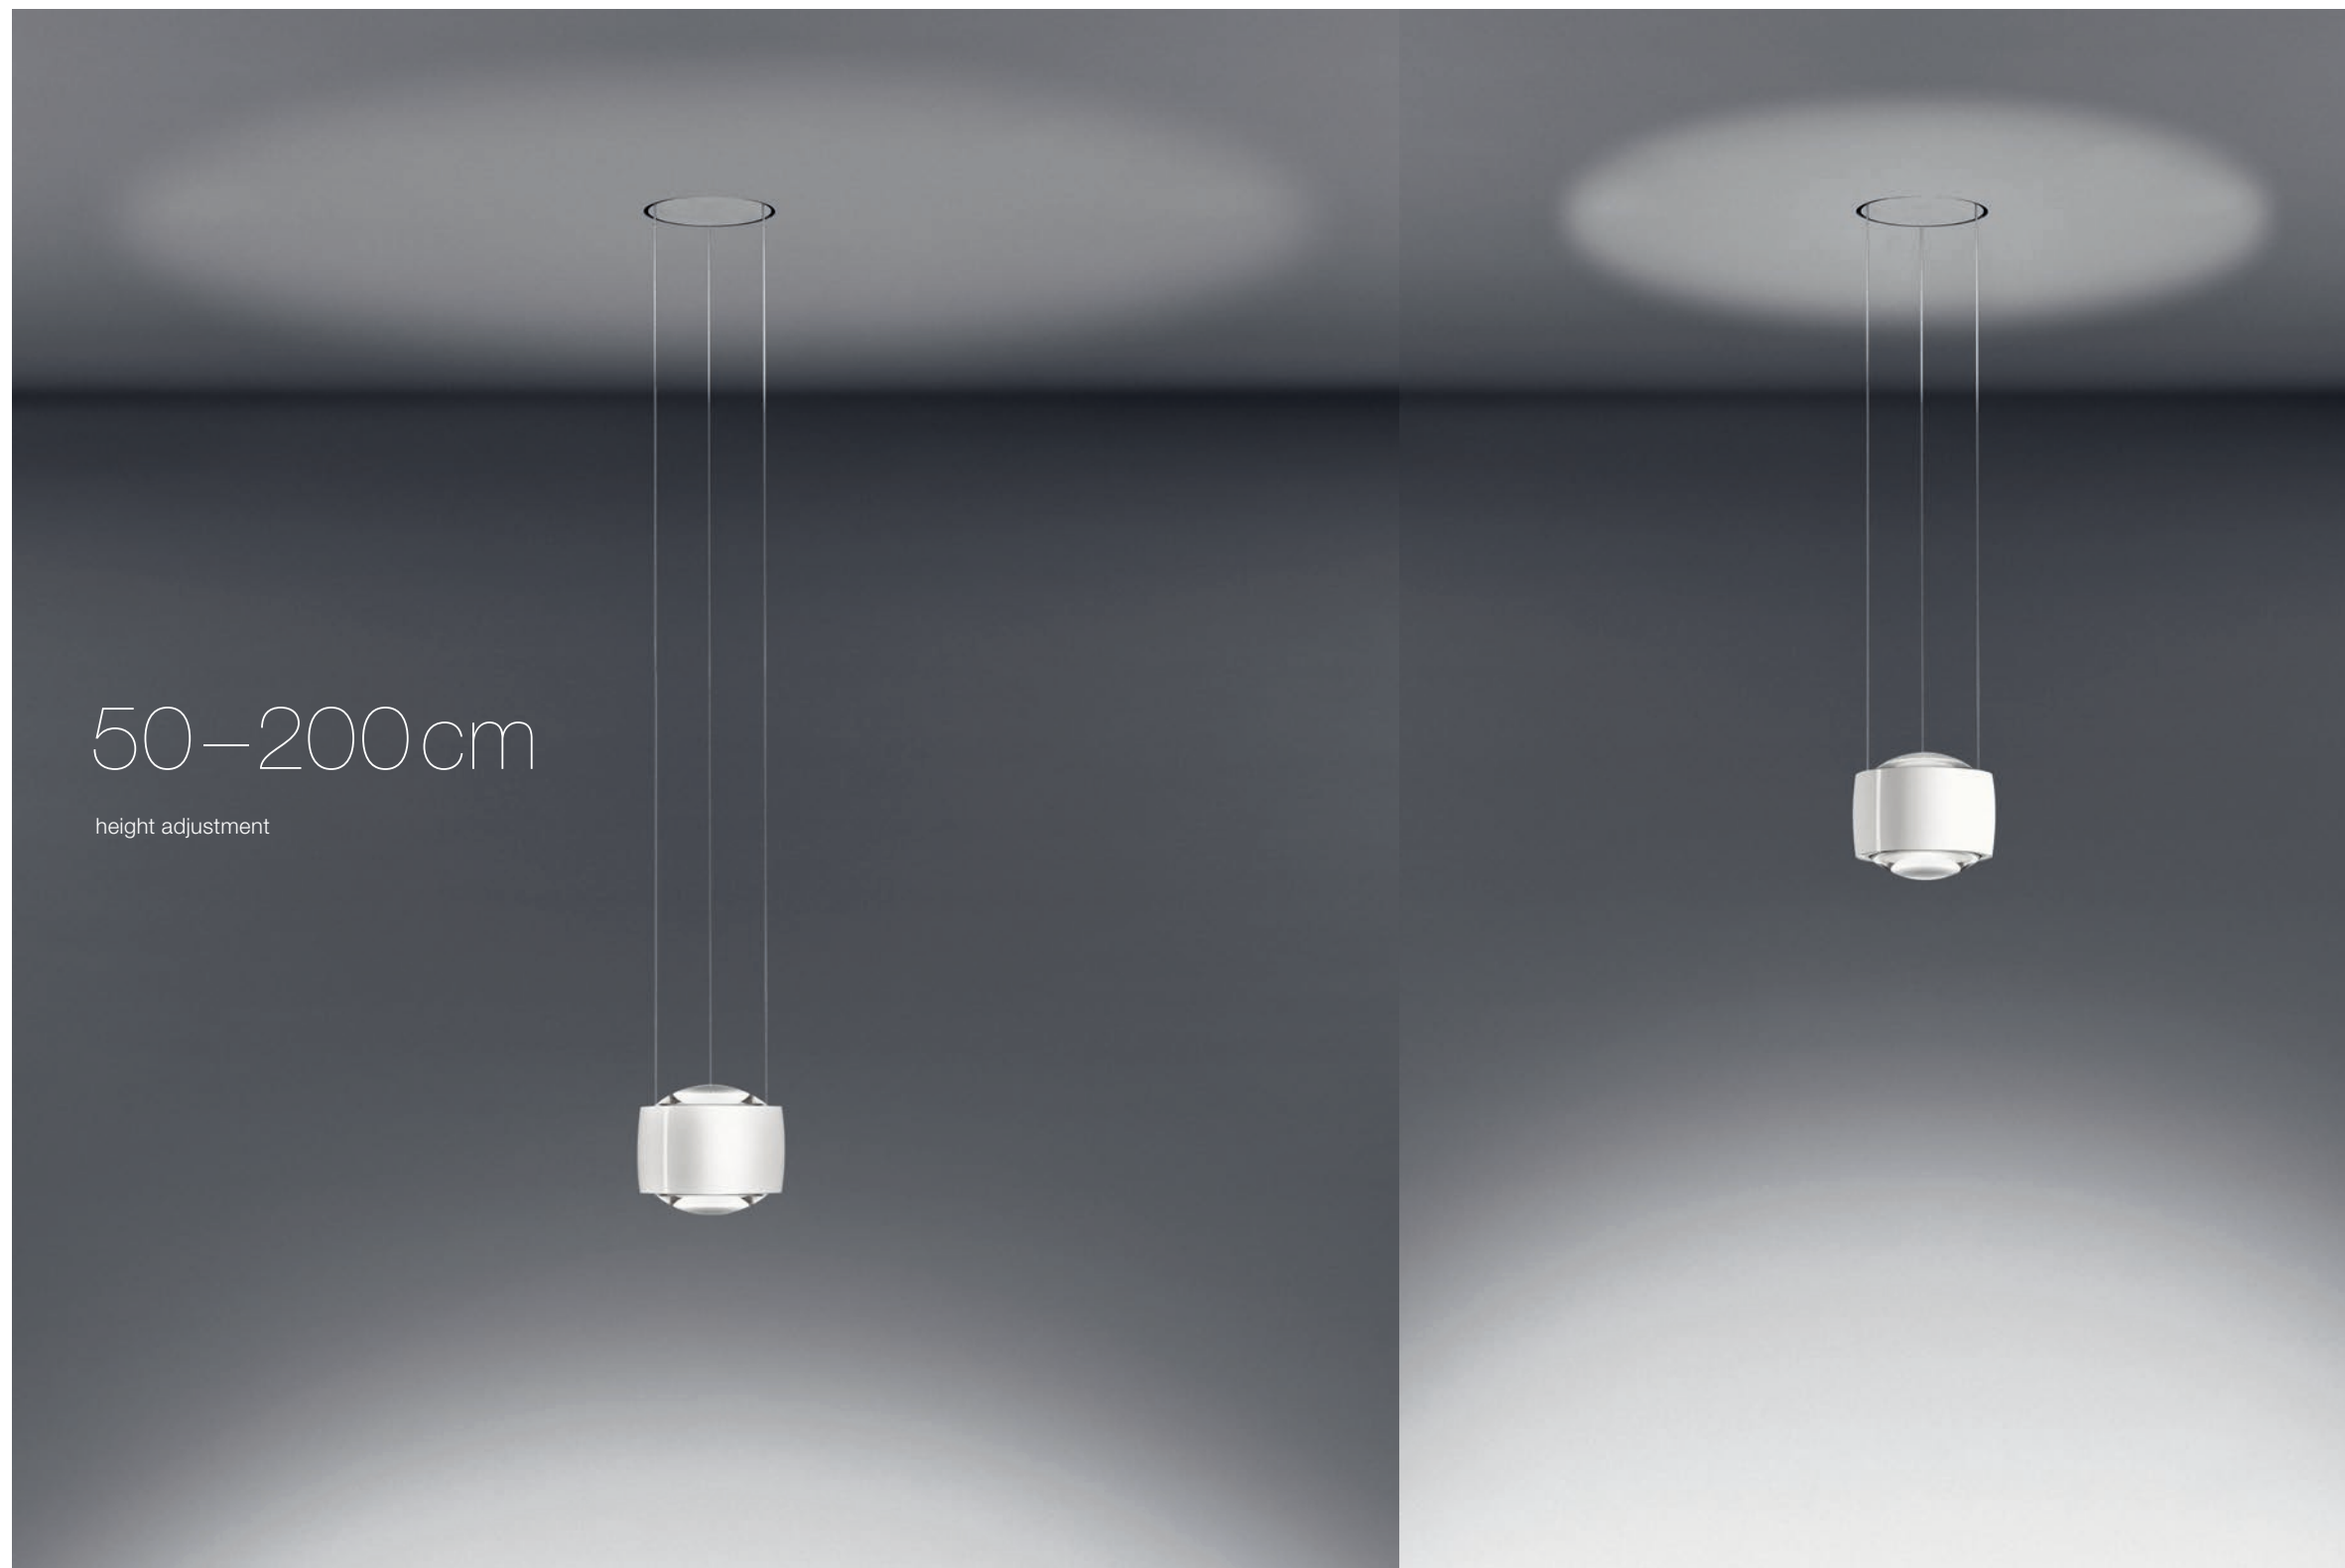

The essence of maximum quality of light and ease of use

Design Axel Meise, Christoph Kügler

Sento sospeso

the unique suspended luminaires system

height adjustment – with the optional height adjustment feature, the pendant length can be adjusted between 50 cm and 200 cm. In the process, the cable disappears from view into the ceiling («trimless» version, see illustration) or into the ceiling canopy.

The convenient height adjustment of the Sento sospeso is unparalleled: Thanks to a sophisticated reel mechanism, the pendant length can be easily and precisely adjusted at any time. The cables can be lengthened or shortened in a completely even and smooth motion.

Sento sospeso

suspended luminaires – features

touchless control – Sento sospeso can be switched and dimmed with simple gestures – touchlessly and intuitively thanks to innovative infrared sensors.

up/down fading – using »touchless control« or Occhio air, the full light output can continuously be drawn from uplight to downlight.

synchronization – Sento sospeso is designed for luminaire sequences: Connected via a control line or grouped with Occhio air, the light settings can be synchronized (this feature is integrated in the due and tre models).

Occhio air – the intuitive Bluetooth-control, directly integrated in the head (optional).

The brightness is adjusted via »touchless control« directly at the light source – the head of the luminaire. Via gesture control, the full luminous power can be drawn from one side to the other.

Più

The power of innovation

Design Axel Meise, Christoph Kügler

Più

the modular spotlight system for holistic lighting design

plug & play – Occhio VOLT makes the handling of light as easy as in the days of the light bulb: The innovative technology can be connected to the mains voltage without a power supply unit and opens the way to a world of revolutionary pure design.

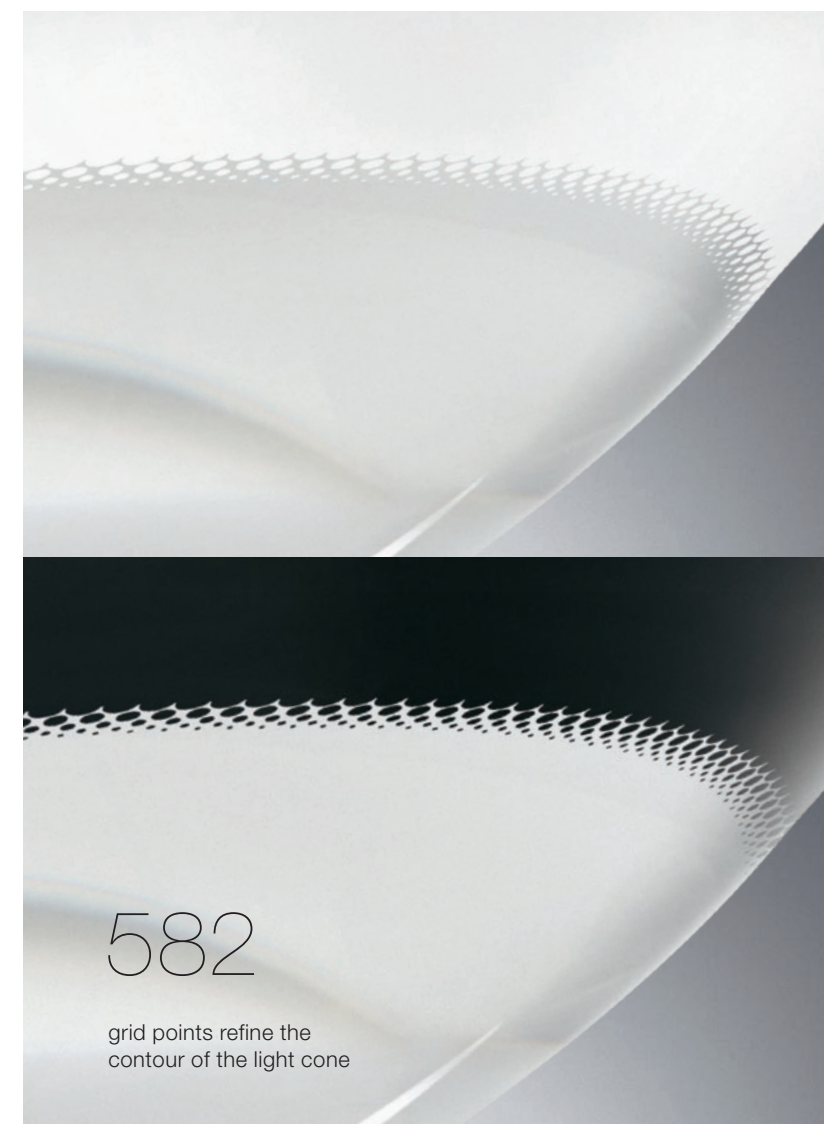

Più combines recessed, surface-mounted and track spotlights into a comprehensive, modular system. Thanks to the Occhio VOLT light engine, surface-mounted spotlights can be installed without remote power supply units: »plug & play«

Più

recessed, surface mount and track spotlights – features

Più offers unlimited possibilities for use. Clean lines represent the unifying element of all models, with the double hull forming its unique design feature. The »floating« lens in the middle gives the spotlight its unmistakable character. The latest »perfect color« LED technology and an array of lens optics create an extraordinary quality in light depiction.

choose your light – characteristic Occhio lens optics work in synergy with changeable inserts to produce a quality of light that inspires – and provides nearly unlimited freedom for lighting design.

create your style – depending on the surface color of the head, you can choose between the lens with a black or with a white rim. This way the spotlights integrate perfectly into their environment.

Più RS

a class of its own

a class of its own – Più RS is equipped with an innovative zoom function with which the beam can be set continuously between 20° to 60°. Thanks to 3d kinematics, the light can be pointed in any direction. Adding to this are strong 32-watt LED power in a compact design. This creates exceptionally flexible situation-based lighting designs in residential and public settings.

Più RS ambience spotlights deliver exceptional performance with their high luminous power thanks to intelligent heat management. Their zoom and 3d kinematics features offer the utmost in flexibility. With its extraordinary floor spotlights basso and terra, Più RS opens up entirely new possibilities in lighting design.

House M, Munich: flowing spaces, consistent light quality – This is where the 3d family of luminaires is in its element. The three very unique personalities, io, lui and lei, make compelling statements with their individual talents - combined into a multifunctional system, they let room concept as a whole shine.

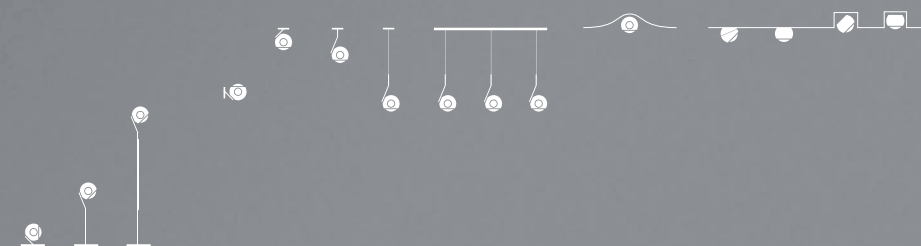

Occhio Lounge Cologne: Showroom for light culture – while io lettura and lei sospeso accentuate individual living areas, the new lui volto spotlight makes the wall the real star in the room.

io

Pure design, magical mobility and unique operation:
a totally new experience for interacting with light

Design Axel Meise, Christoph Kügler

io spotlights

recessed and surface mount spotlights – features

3d movability – the io giro surface-mount spotlight can be rotated freely thanks to the virtually invisible separation of the two sphere halves and can also be swiveled up to 45° from a vertical position. Its pure, spherical form always is highlighted.

plug & play – Occhio VOLT makes working with light as easy as it was in the days of the light bulb. The innovative 230 V LED technology can be used without power supply units and allows revolutionary, pure design.

The aesthetics of movement: io spotlights with their unmistakable minimalism. Magical movement functions and the characteristic lens optics make the io spotlights a unique, multifunctional system.

io 3d

the luminaire system for individual lighting design

3,14159265

π = circle ratio

choose your light – thanks to an ingenious magnetic catch, the lens can be removed with a simple twisting motion and individually configured with up to two optical inserts. The lighting effect can thus be tailored exactly to the situation.

3d movability – the unique Occhio 3d joint lets the luminaire head of io virtually float and enables total movability within the room – with magical movement.

joy of light – the io luminaire series is synonymous with joy: joy in the playful use of light. Joy in the individual design options of the luminaire and the lighting effects. Joy in the perfect synthesis of form and function.

io 3d

luminaire system – features

Intuition through innovation – new technology creates new freedom. Naturally, the brightness can be controlled where the light originates: on the head of the luminaire. With a simple gesture, the light can be switched on and off or can be dimmed intuitively and touchless.

touchless control – io 3d table, floor and suspended luminaires can be operated without touching them thanks to an infrared sensor system. In the case of wall and ceiling luminaires, the gesture control system can be enabled or disabled as necessary.

create your style – the changeable grip pads, available in different colors, provide extraordinary options for customization.

lui

3d kinematics, interchangeable lenses, zoom – lui combines lighting technology and design in a radical form

Design Axel Meise, Christoph Kügler

lui

the multifunctional light tool

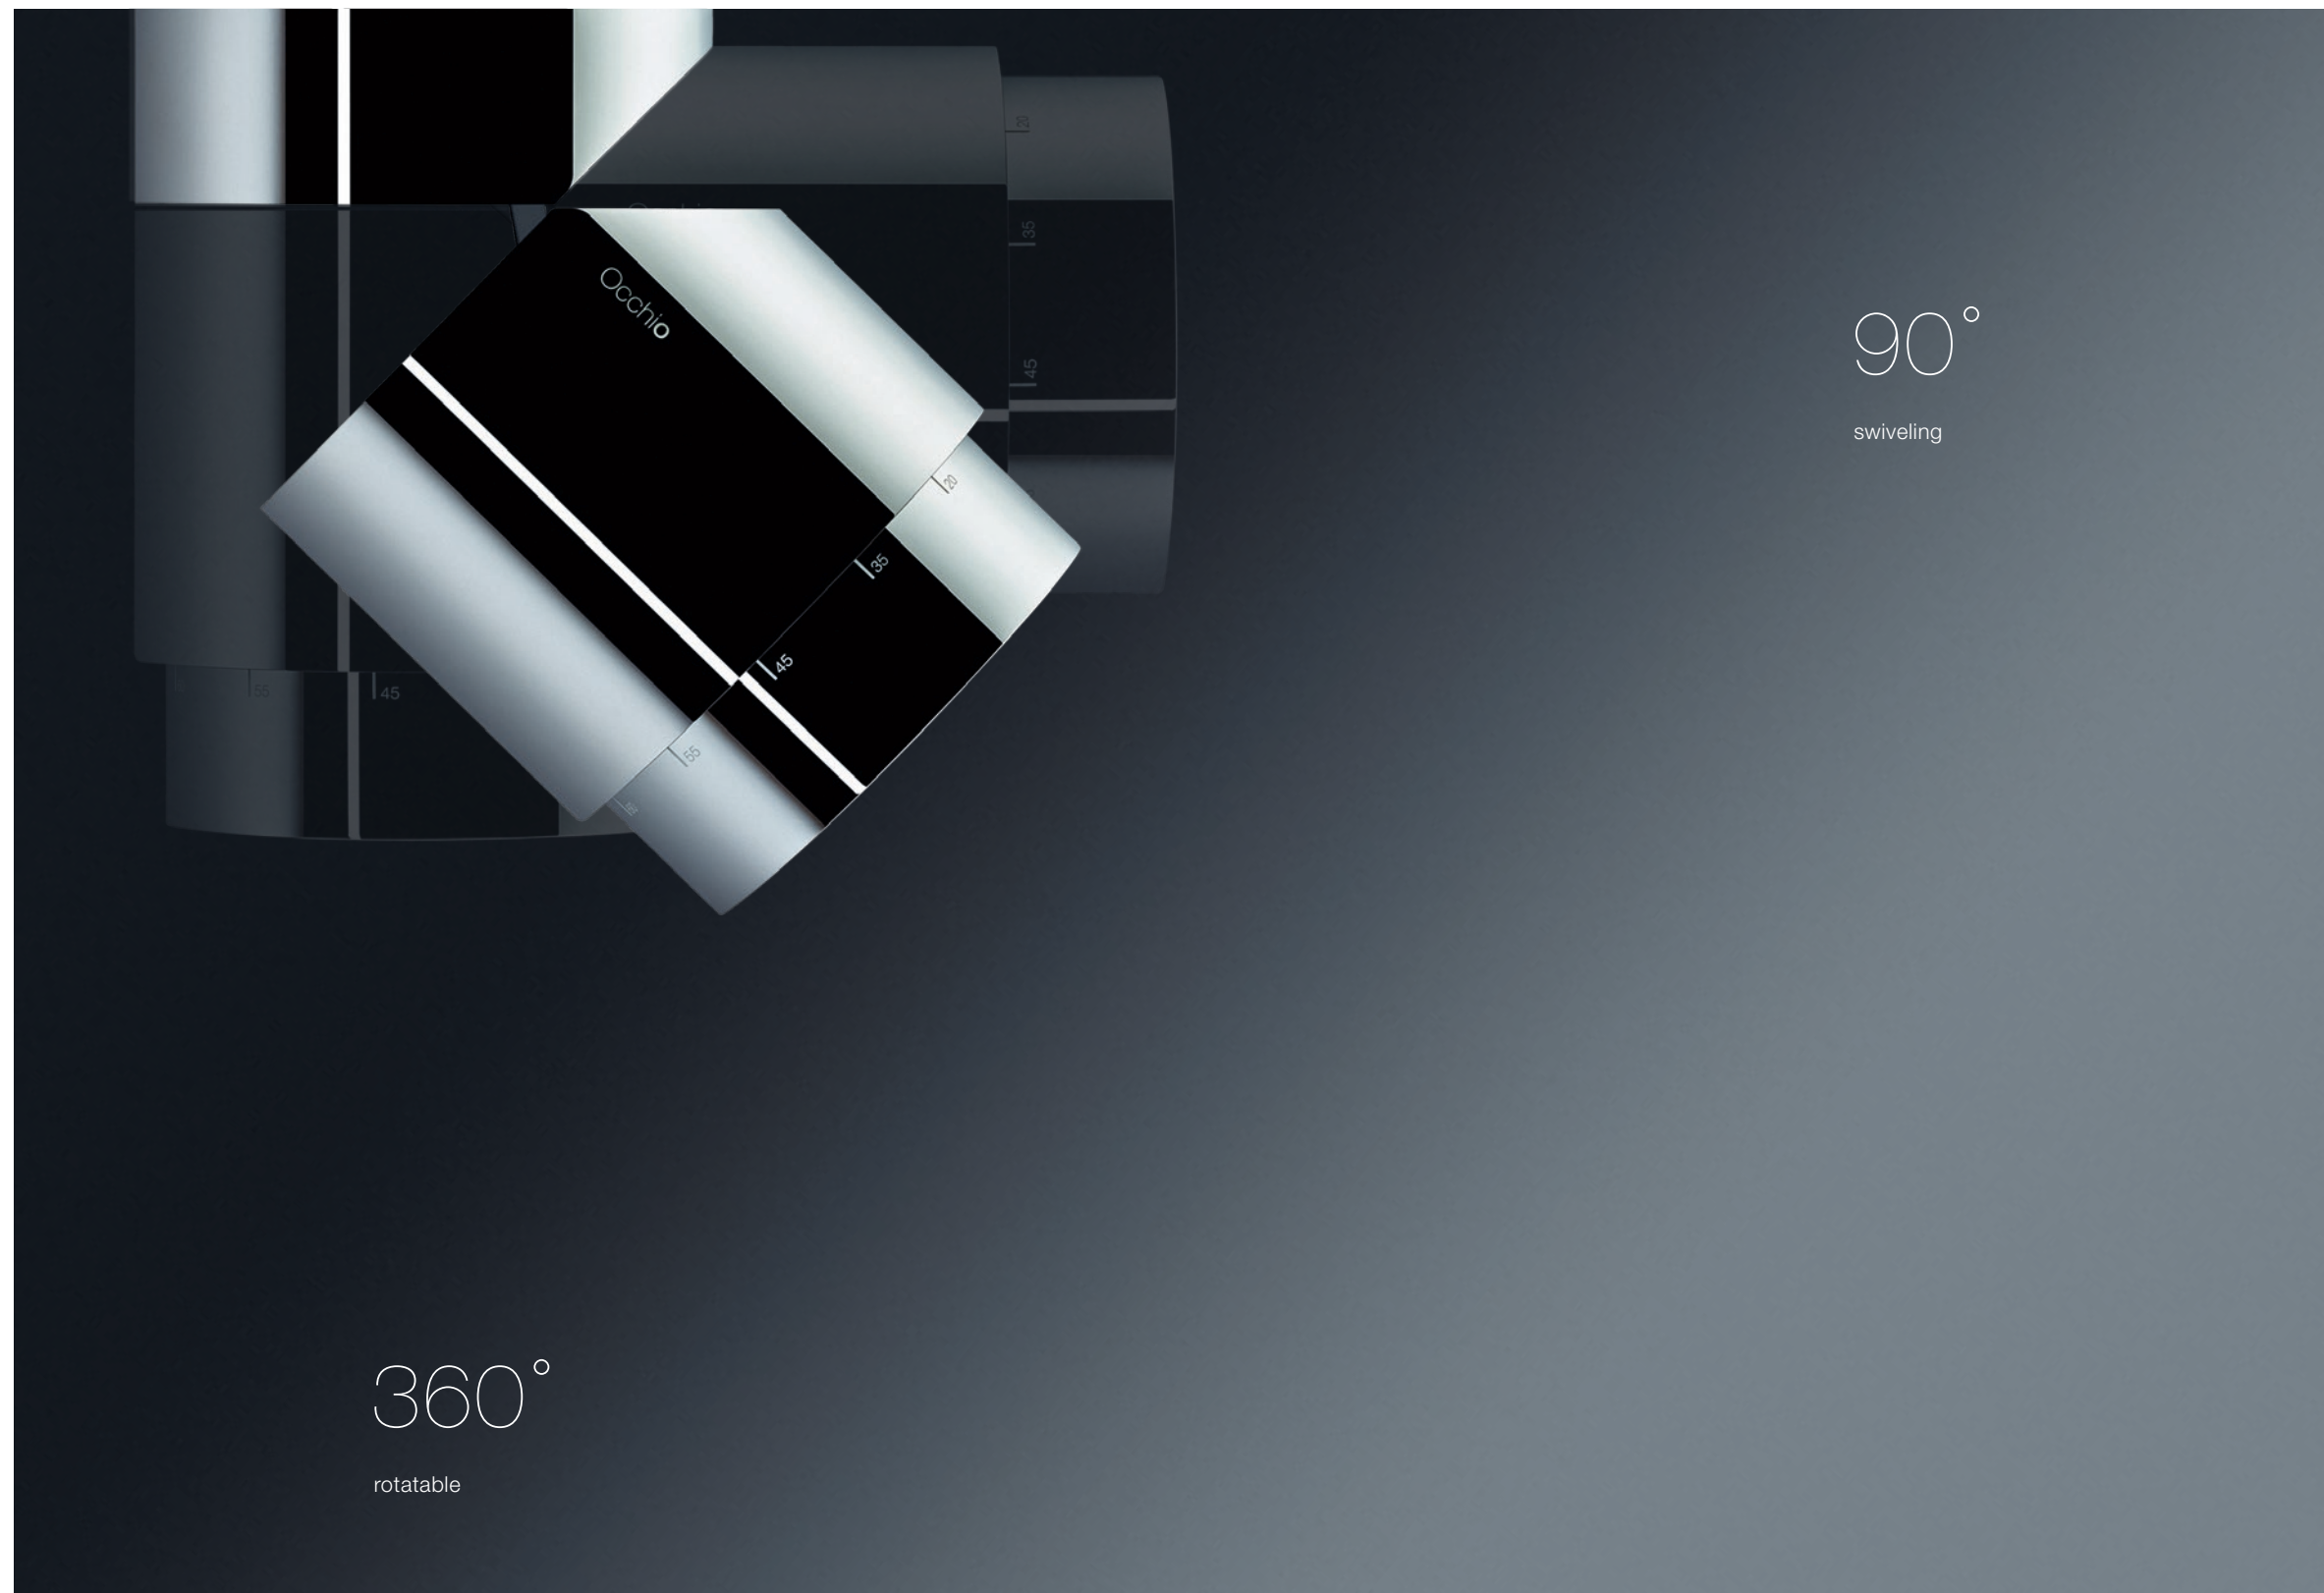

choose your light – you have the choice: with the zoom optic the light cone can be set anywhere between 20° and 60°. The lens optic uses interchangeable inserts to create precise lighting effects.

The lui spotlight system is lighting technology in its most beautiful form: interchangeable lenses as found in the field of photography open new lighting possibilities – with top quality light and maximum efficiency.

lui spotlights

recessed, surface mount and track spotlights – features

3d movability – the mobility of the spotlights is inspired by geometry. The virtually invisible joint mechanism really emphasizes the clear, functional form.

plug & play – Occhio VOLT makes working with light as easy as it was in the days of the light bulb. The innovative 230 V LED technology can be used without power supply units and allows revolutionary, pure design (lui surface mount spotlight).

The new lui spotlight range combines clear, minimalistic design, the latest LED technology and perfect lighting in a comprehensive range of recessed, surface mount and track spotlight systems.

lei 3d

the luminaire system with magical transformation

choose your light – when the iris is open, it allows the light to be directed outwards. If it is closed, the translucent shade lights up from inside, producing a remarkably atmospheric light.

Extroverted or introverted, shade luminaire or spotlight – lei is the new variability of light. It surprises with its sophisticated lighting system: an adjustable iris allows various light moods to be created.

lei 3d

luminaire system – features

lei celebrates the magic of variability. With an elegant lightness, it shows off its extraordinary flexibility thanks to its modularity and 3d movability. A variety of style options with various color combinations offer maximum freedom of design. lei can thus be perfectly coordinated with the architecture and interior design of the room.

create your style – the interchangeable rings and covers of the luminaire head are available with various surfaces and can therefore be customized individually.

3d movability – the unique Occhio 3d joint invisibly connects the head of the lei luminaire to the luminaire body, allowing free, three-dimensional movement.

Innovation

Shaping added value – our commitment to innovation is deeply integrated into Occhio's DNA. For one reason: Innovation opens up new opportunities for using light to influence how people interact with their environment.

Occhio air

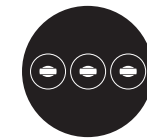

With Occhio air, we have added a new operating dimension to our modular luminaire systems. Light can be controlled easily and intuitively by app or the Occhio air controller directly via Bluetooth.

Occhio air

design by light – simple, intuitive and from anywhere

luminaire – control
of individual luminaires

group – control multiple
luminaires simultaneously

scene – create lighting
scenes and recall them

Create a mood in your rooms simply by a push of a button. No matter whether you want to turn on, dim or fade lights or possibly even create entire lighting scenarios or groups – Occhio air provides you with individual design options that can be changed at any time with the help of its simple installation and intuitive operation.

Occhio air

the new freedom with light

Sento air head

The Occhio air's control unit is directly integrated into the luminaire heads of the Sento system – free from the constraints imposed by any home automation system. As a result, luminaires can be controlled directly via Bluetooth – without any additional installation work. The integrated up / down fading with double-sided heads can create novel effects in your room.

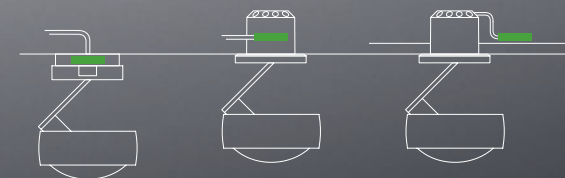

Sento

Sento sospeso

Occhio air module

Recessed and surface mount versions are available for all other Occhio wall and ceiling luminaires with a trailing-edge phase cut dimmer.

(Sento / Sento sospeso)

Occhio air + touchless control –
Occhio air can be combined with
the intuitive gesture control system.
(Sento/Sento sospeso)

Occhio air

maximum ease of use for every situation

controller

With the Occhio air controller, you can operate luminaires and create moods in a room without using an app – at any time and anywhere in the room. The controller is available in four colors as a mobile table version or with a magnetic wall mount (optional).

app

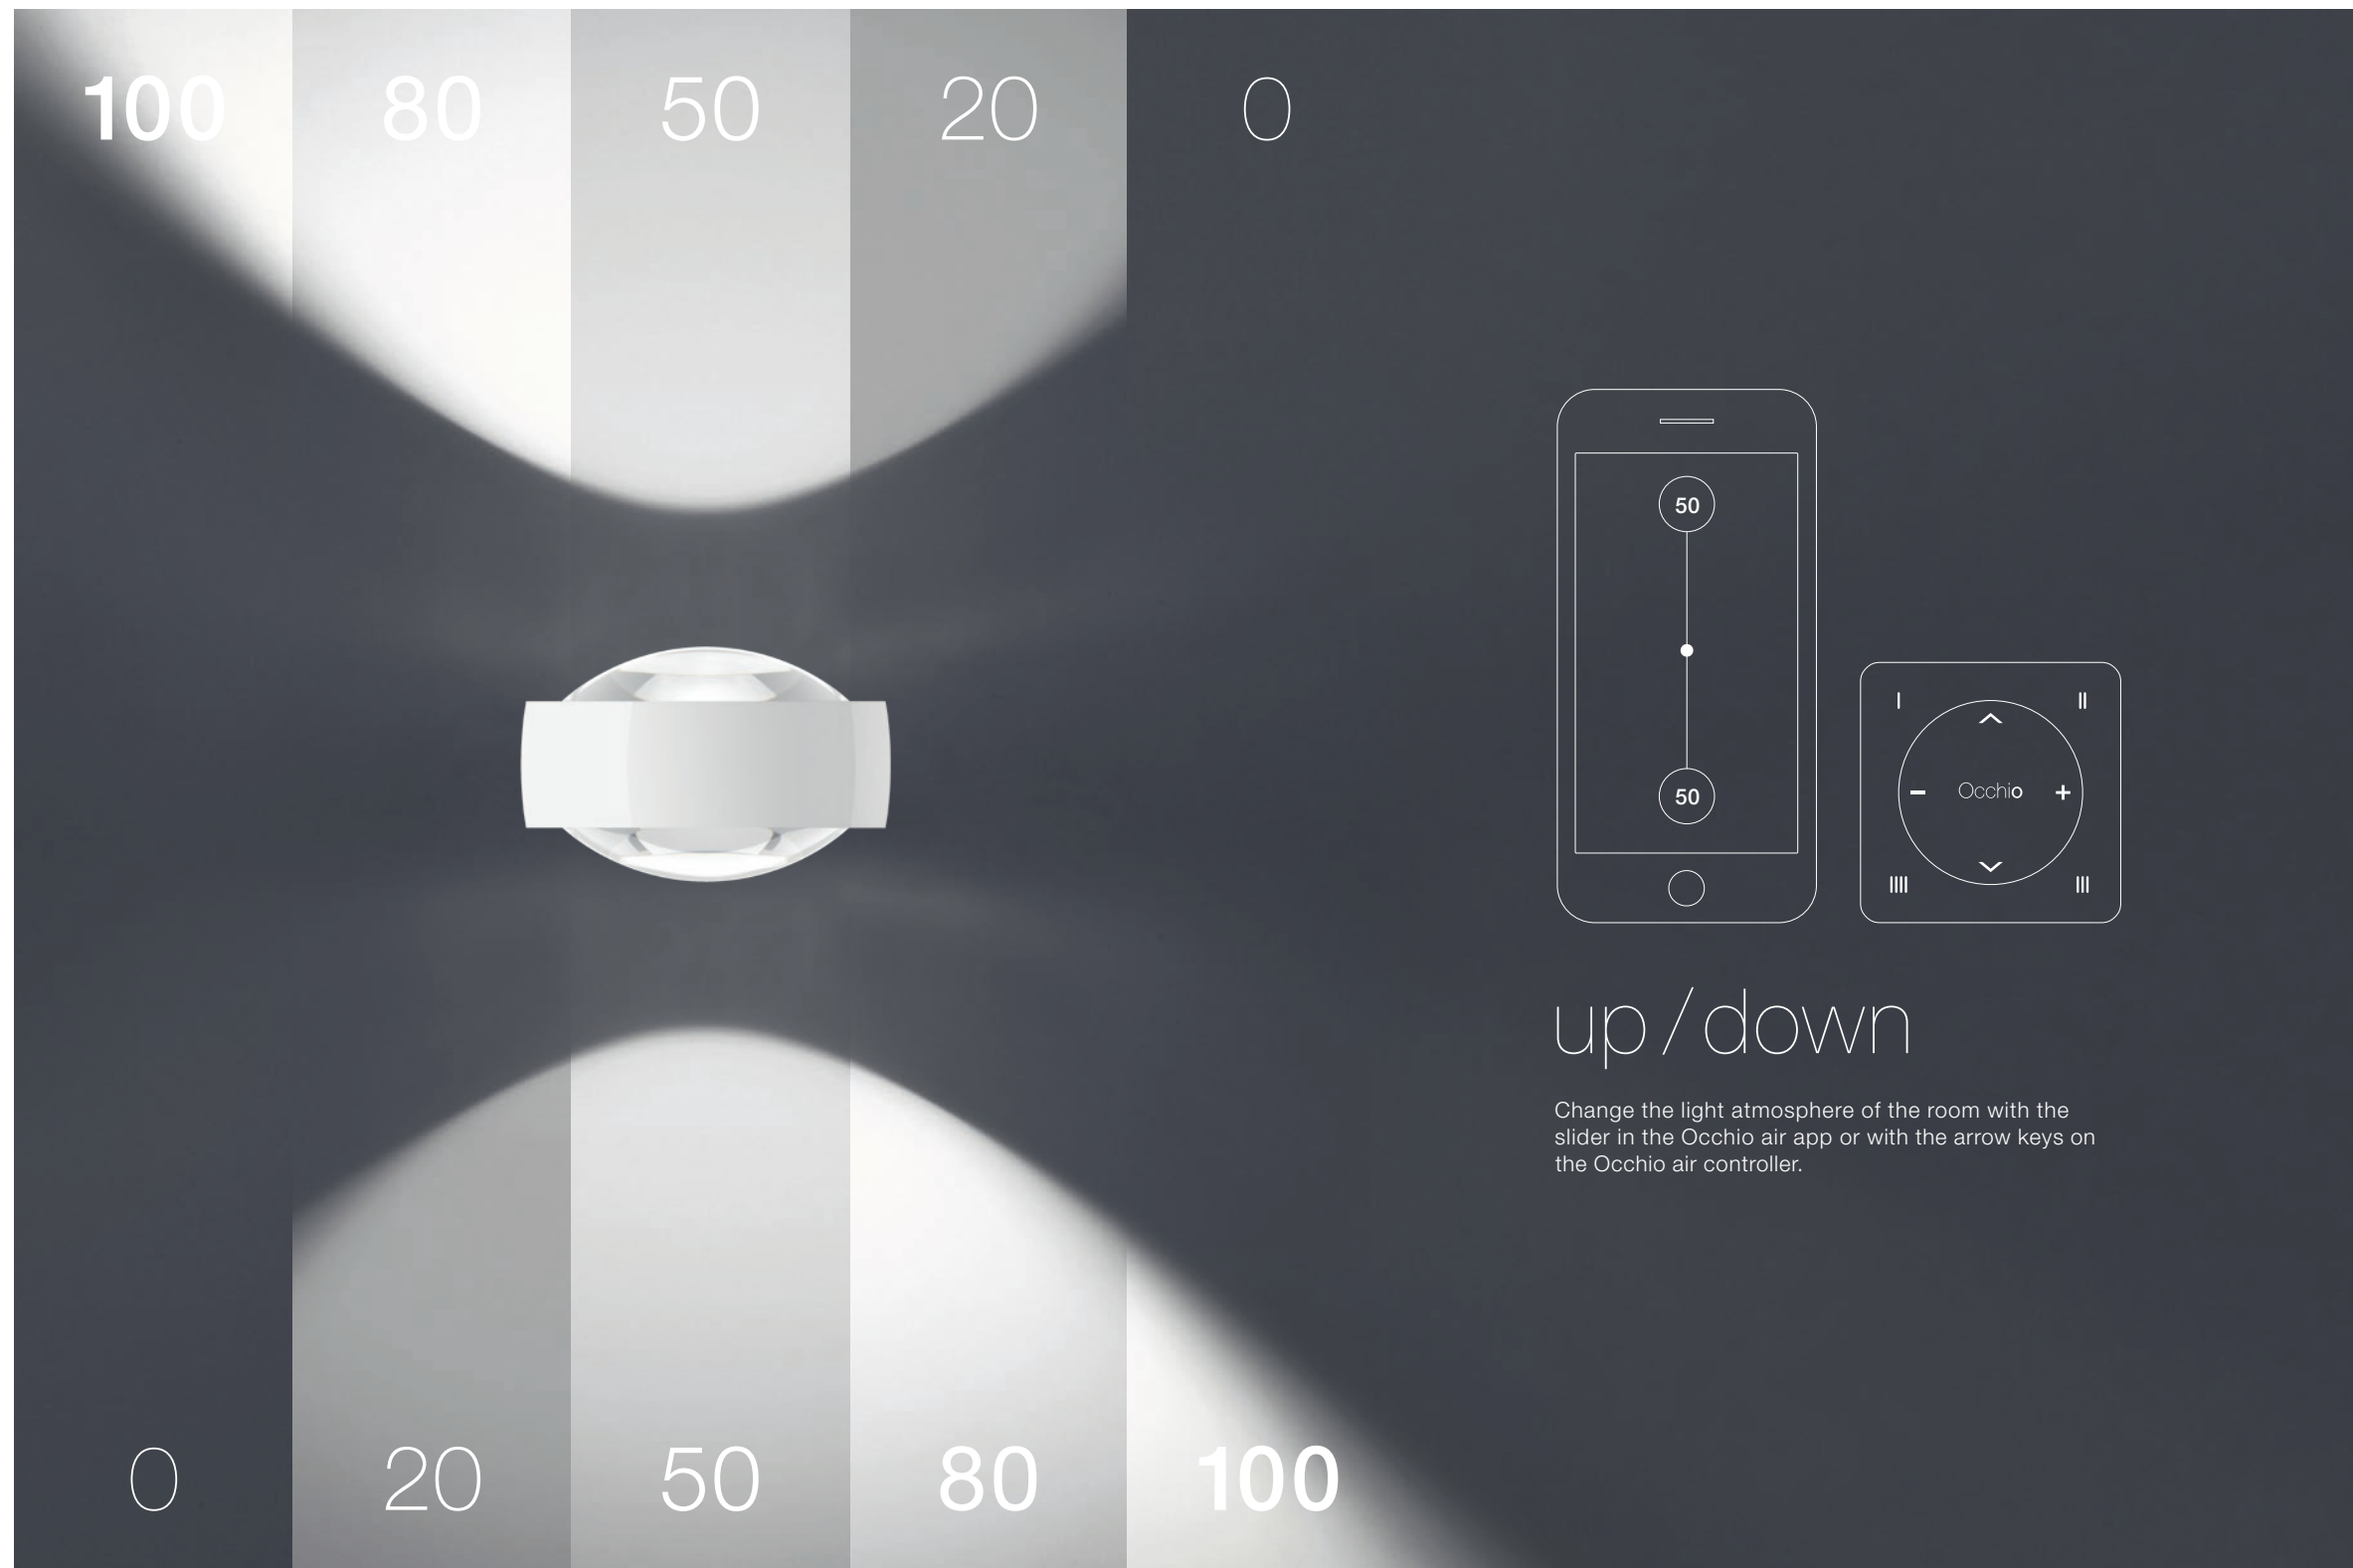

The Occhio air app is available free of charge in the App Store or in Google Play. It can be downloaded on tablets or smartphones.

up/down fading

directing the light in the room

up/down fading is a truly unique feature of Occhio. The light, of one or more luminaires, can be drawn from one side to the other in any ratio and thereby creates novel ways to change the lighting mood of a room. The system is operated by »touchless control« or Occhio air.

up/down fading – with the help of gesture control or Occhio air, the entire luminous power can be pulled from one side to the other.

up/down preset – every imaginable ratio from uplight to downlight can be set and saved. Uplight and downlight can now be dimmed on the basis of stored settings.

Sento

Sento sospeso

Occhio air – the intuitive Bluetooth-control, directly integrated in the head (optional).

touchless control

intuition through innovation

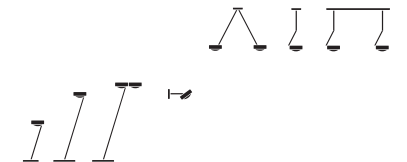

New technology creates new freedom. It almost goes without saying that brightness is controlled at the light source, the head of the luminaire. Switch the light on or off or dim it with a simple gesture – intuitively without touching it.

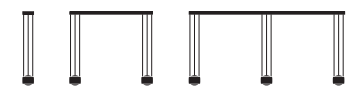

touchless control – with the help of »touchless control«, light can be switched, dimmed or faded by the lightbeam with a hand – touchlessly and intuitively thanks to innovative infrared sensors.

VOLT light engine

the start of a new era

dimmable via a trailing-edge phase cut dimmer

color temperature selectable
2700 K or 3000 K

efficient thanks to the latest LED technology

adjustable luminance
32 (RS) / 26 / 18 / 13 W

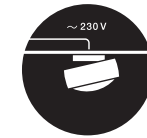

long life
> 40.000 h

Occhio's VOLT light engine is the first on the market a vailable 230V LED that combines all key qualities into a single module.

VOLT light engine

plug & play

plug & play – with VOLT, you will no longer have to think twice about technical consideration when you select a luminaire or bring a good lighting concept to life: The luminaires can be directly connected to the supply voltage without using any power supply units.

Pure design thanks to VOLT light engine:
The integration of all components into one
module creates new design possibilities.

perfect light

quality of light means quality of life

The only valid lighting reference for Occhio is the sun itself. The quality of light of our new »perfect color« LEDs comes very close to this ideal: Colors appear with as much nuance and depth as they do in nature. Because quality of light means quality of life.

**Color rendering**

The perceived quality of light is determined by the quality of rendering of the visible light spectrum. The measuring unit is the so-called color rendering index (CRI). As a reference, natural sunlight has a CRI of 100. The Occhio »high color« LEDs come very close to this ideal with a CRI of 97, producing the best possible color rendering.

CRI
97

LED
PERFECT COLOR

The culture of light

Light is an essential part of our lives. Good light fascinates and gives us positive energy. Light quality means quality of life.
