Mito

Occhio

# a new culture of light

We are fascinated by the idea of allowing people to shape the lightscapes of their personal space, using light to enhance their quality of life.

Light is considered the fourth dimension of space.  
The holistic philosophy of Occhio offers unprecedented  
possibilities for lighting design – for all areas of life.

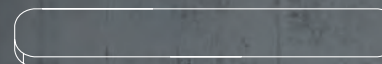

# X series

Mito combines design quality, light quality and the interaction with light in a unique, comprehensive system – for a new dimension of lighting experience.

Mito

The myth of light

# Mito sospeso

Our masterpiece – perfection down to the last detail, unique in its design and function

Design Axel Meise, Christoph Kügler

Mito sospeso 40, 60  
surfaces rose gold

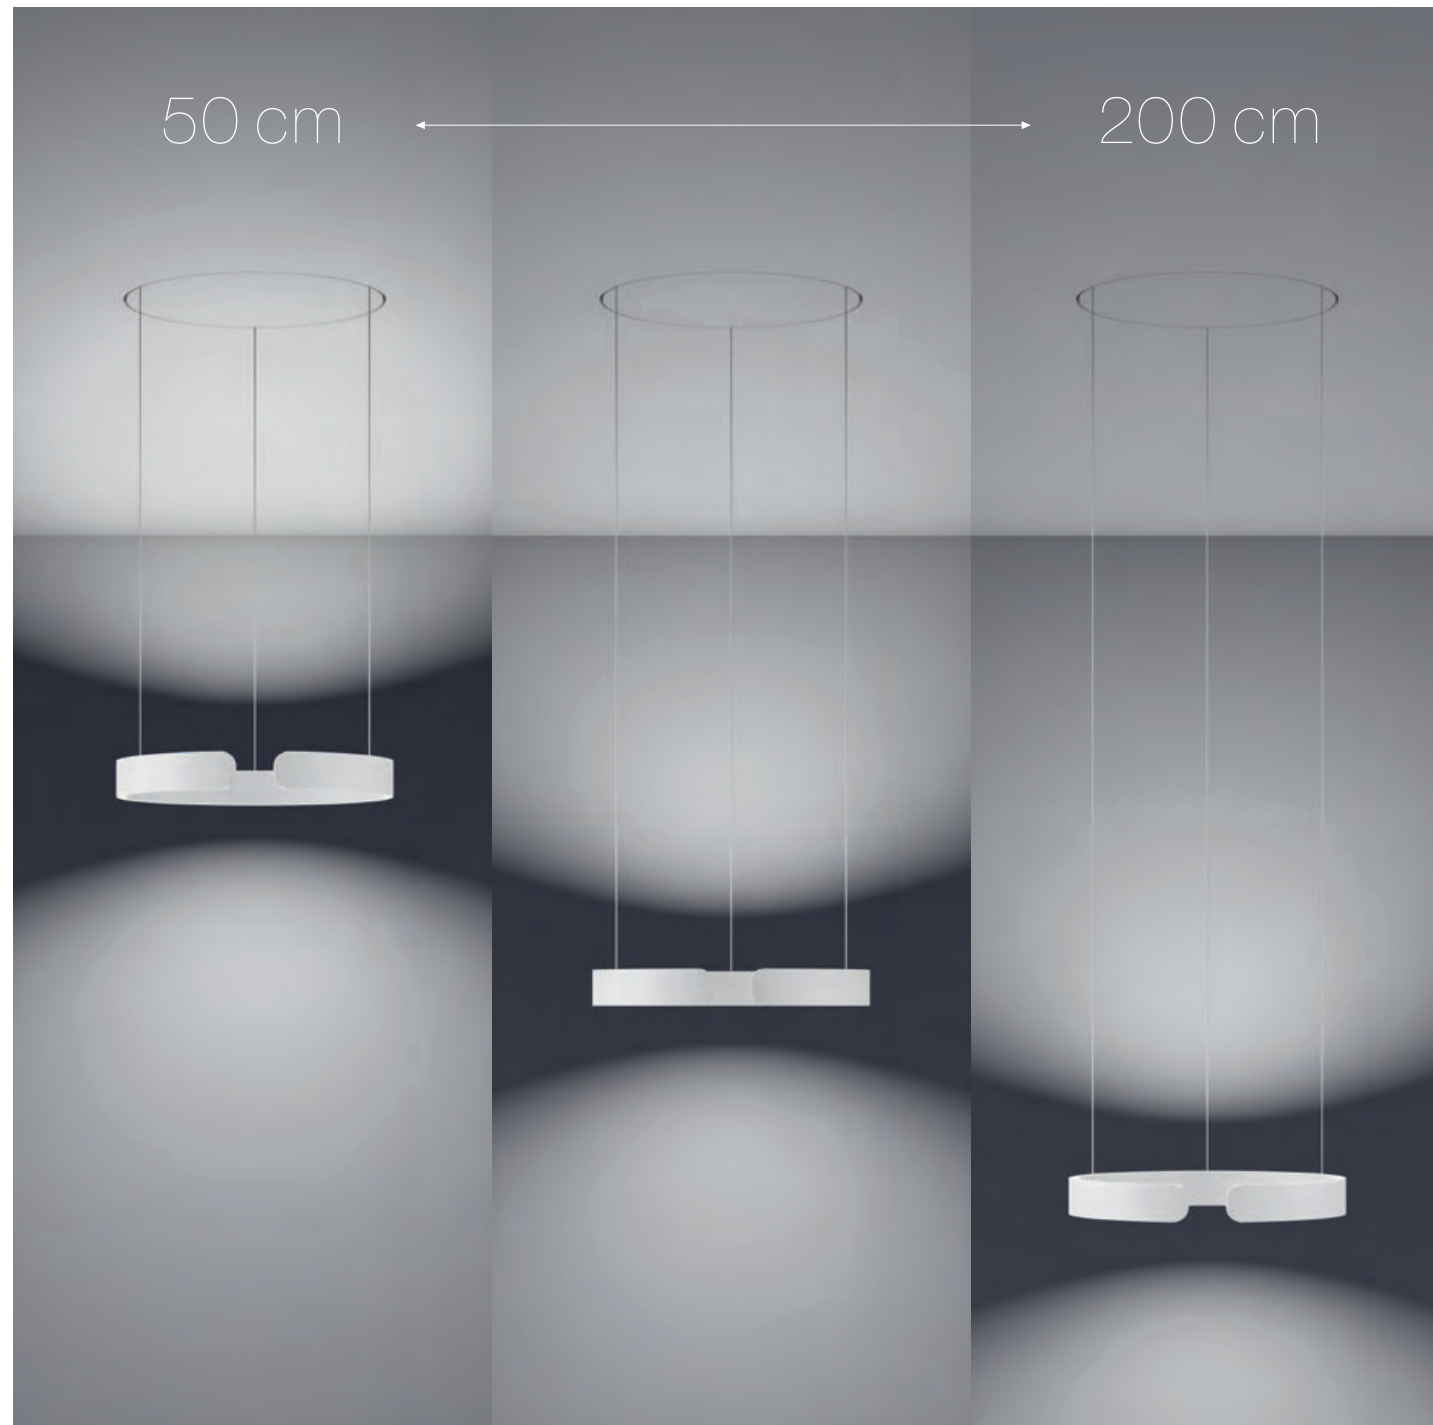

Mito sospeso 40, 60  
surfaces bronze, matt black, matt gold

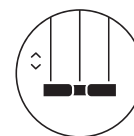

## Mito sospeso

height adjustment

Whether in the room or above a table: Thanks to a unique height adjustment feature Mito sospeso can be adjusted easily and conveniently. A sophisticated reel mechanism ensures that the ring of Mito always remains horizontal at any desired height.

**height adjustment** – the pendant length can be continuously adjusted between 50 cm and 200 cm with an optional height adjustment feature. As they move, the cables disappear into the canopy or even slide invisibly into the ceiling (»trimless« version, see illustration).

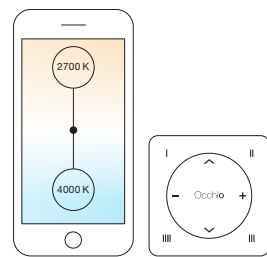

## Mito sospeso

### features

Magic moments: Mito sospeso can be controlled as if by magic. Simple gestures are all it takes for Mito sospeso to change the light intensity and even the color of light. Switches, dimmers, etc. are a thing of the past.

 **Occhio air** – intuitive  
Bluetooth control (optional)

smartphone controller

**color tune** – a feature for regulating the color temperature of Mito luminaires. A simple gesture or Occhio air lets you set the color temperature. From warm light tones with 2700 K to cooler light with 4000 K. A fixed, preset light color is also possible.

**up/down fading** – a unique feature: Via »touchless control« or Occhio air, the full luminous power can be drawn from one side to the other.

**two in one** – Mito sospeso offers double-sided light output with its two LED rings. The uplight and downlight can thereby be operated independently of each other.

**touchless control** – with the help of »touchless control«, Mito sospeso near a user's hand can be controlled with a simple gesture – touchlessly and intuitively thanks to innovative infrared sensors. Depending on the situation, gesture control can also be deactivated.

## Mito suspended luminaires

### light source

# Mito raggio & Mito largo

Expressive statements in interior design

Design Axel Meise, Christoph Kügler

Mito raggio, Mito largo  
surfaces bronze

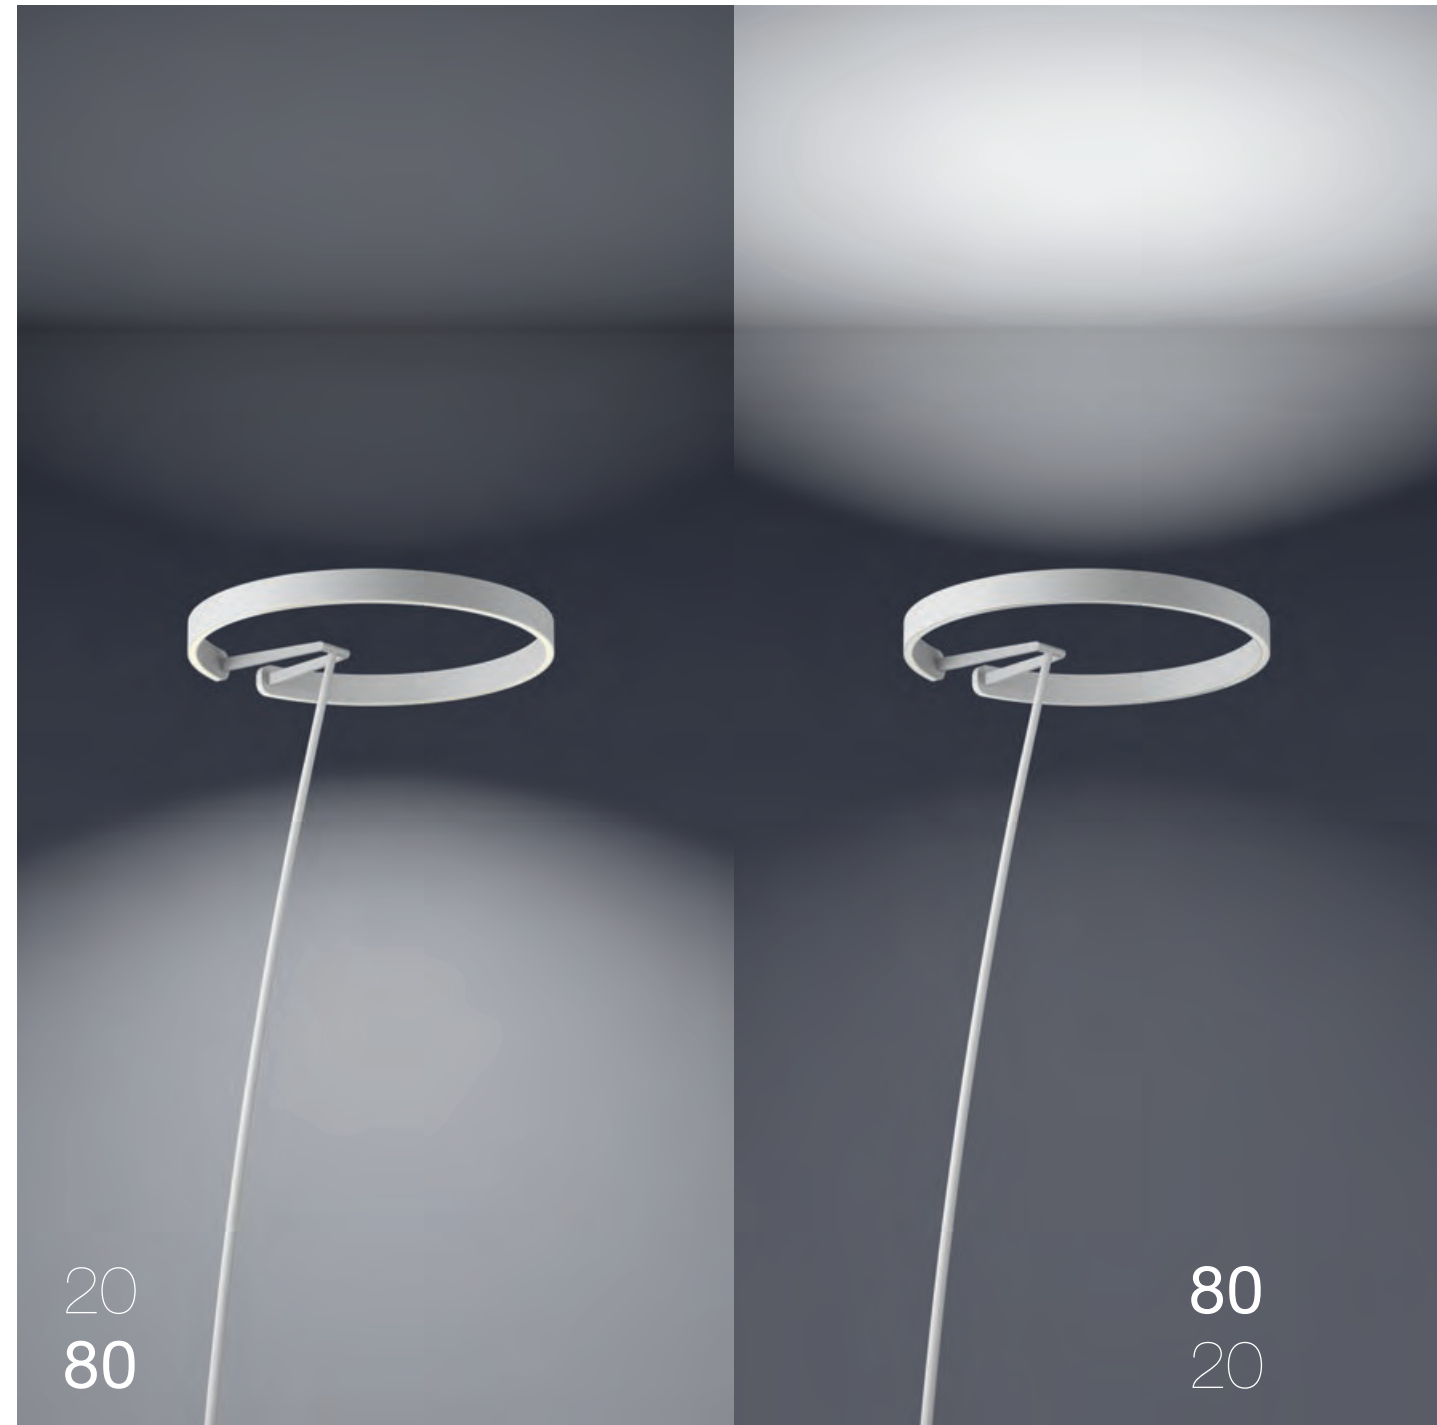

Mito raggio  
surface rose gold

## Mito raggio

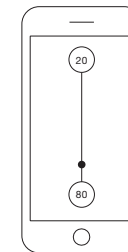

up / down fading

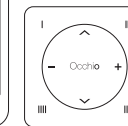

You are the director of your lighting atmosphere: with Mito raggio you can create amazing, powerful lighting scenes – just with a small, intuitive gesture. Uplight and downlight can be controlled separately and with Occhio's »up / down fading« this becomes a stunning experience.

**Occhio air** – intuitive  
Bluetooth control (included)

smartphone

controller

**up/down fading** – a unique feature: Via »touchless control«, »body sensor« or Occhio air, the full luminous power can be drawn from one side to the other.

**two in one** – Mito raggio offers double-sided light output with its two LED rings. The uplight and downlight can thereby be operated independently of each other.

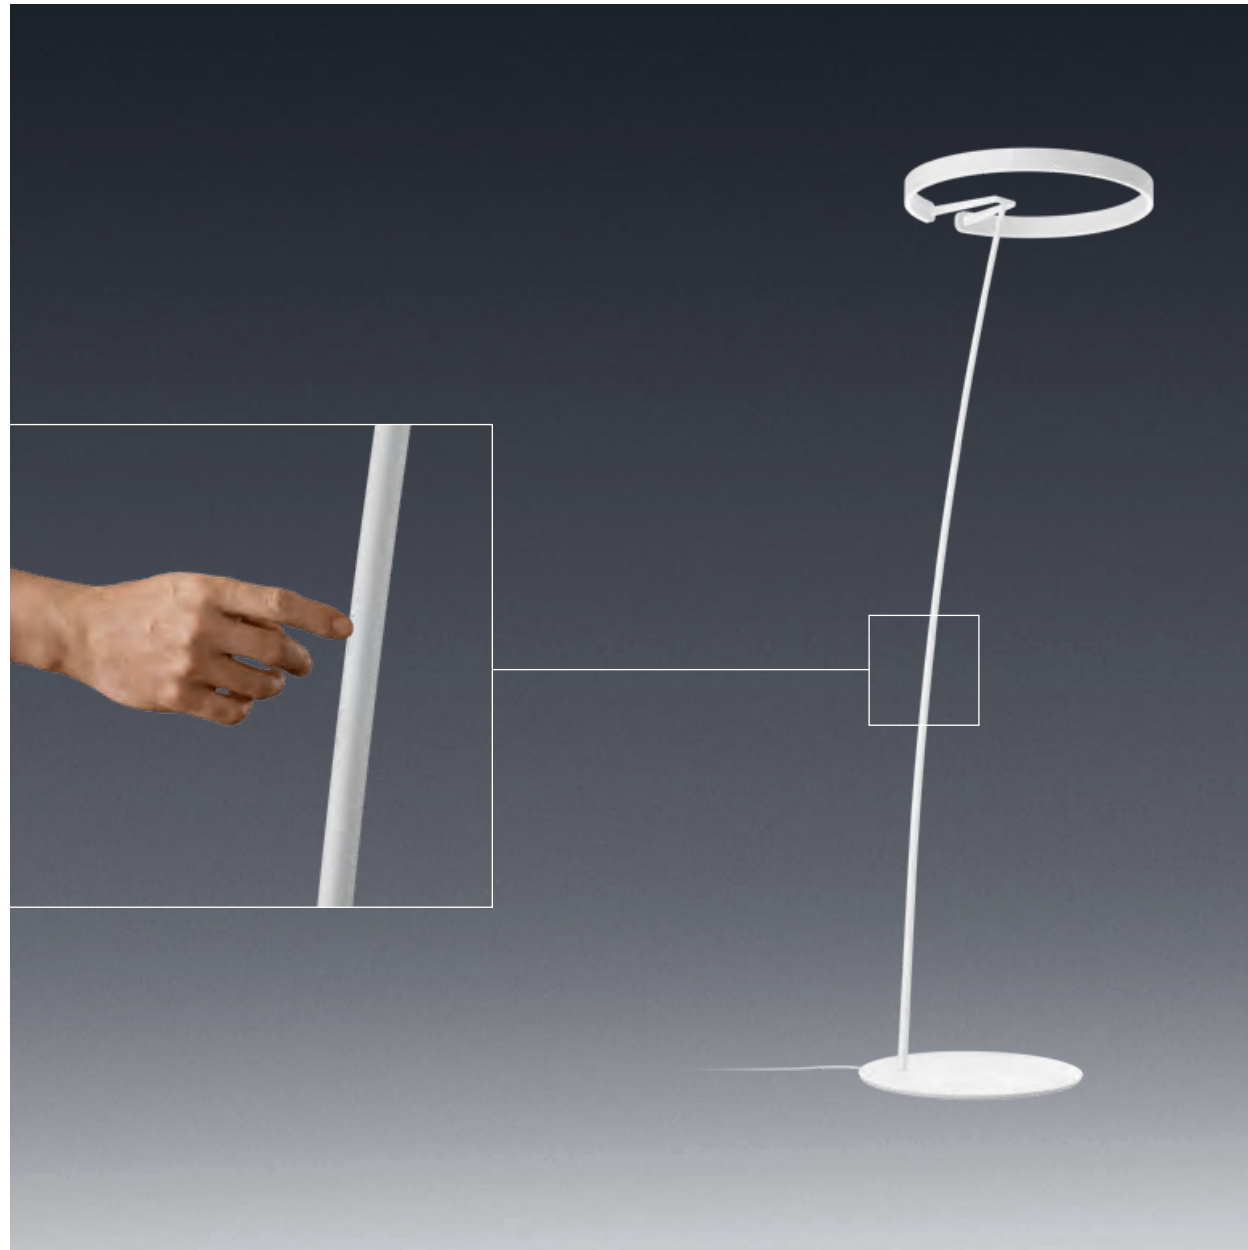

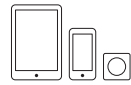

## Mito raggio

### features

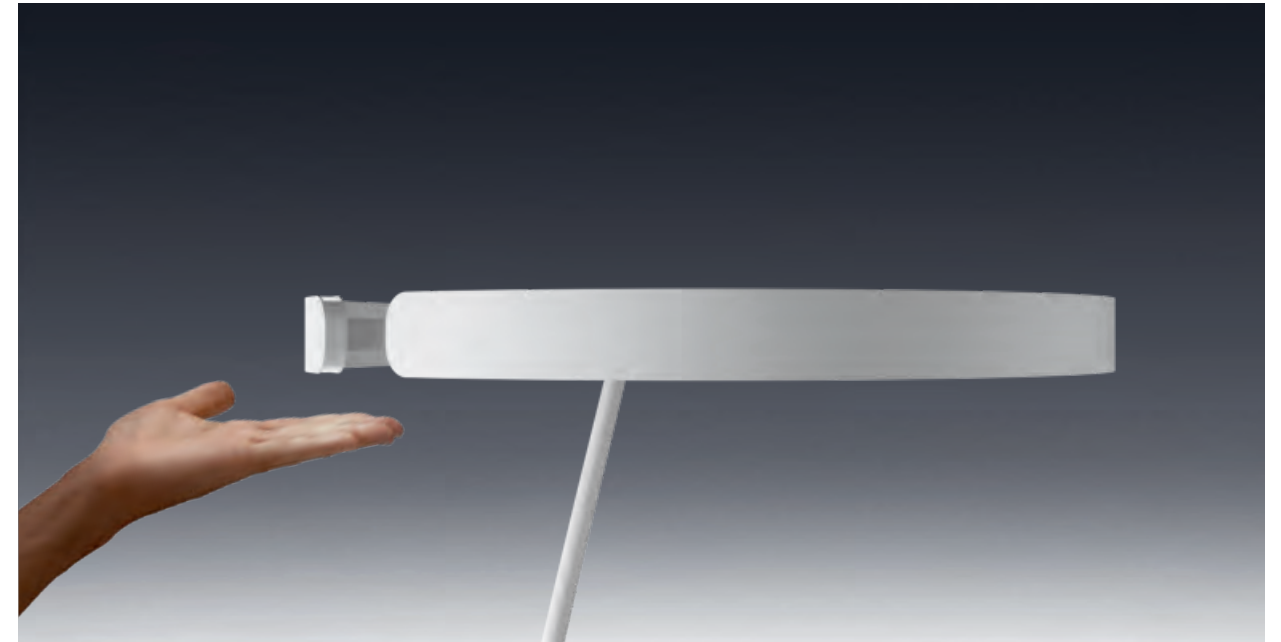

Maximum comfort: Whether passing by or sitting relaxed – thanks to the »body sensor« and »touchless control«, the light of Mito raggio can be controlled in any position. Even the color of the light can be adapted to your mood – with a simple gesture.

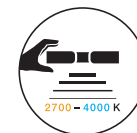

**Occhio air** – intuitive  
Bluetooth control (included)

**body sensor** – the light of Mito raggio can be conveniently controlled via »body sensor« at the hip height – very gently with light finger touches.

**touchless control** – with the help of »touchless control«, Mito raggio near a user's hand can be controlled with a simple gesture – touchlessly and intuitively thanks to innovative infrared sensors. Depending on the situation, gesture control can also be deactivated.

**color tune** – a feature for regulating the color temperature of Mito luminaires. A simple gesture or Occhio air lets you set the color temperature. From warm light tones with 2700 K to cooler light with 4000 K. A fixed, preset light color is also possible.

**Mito raggio**  
surface matt gold

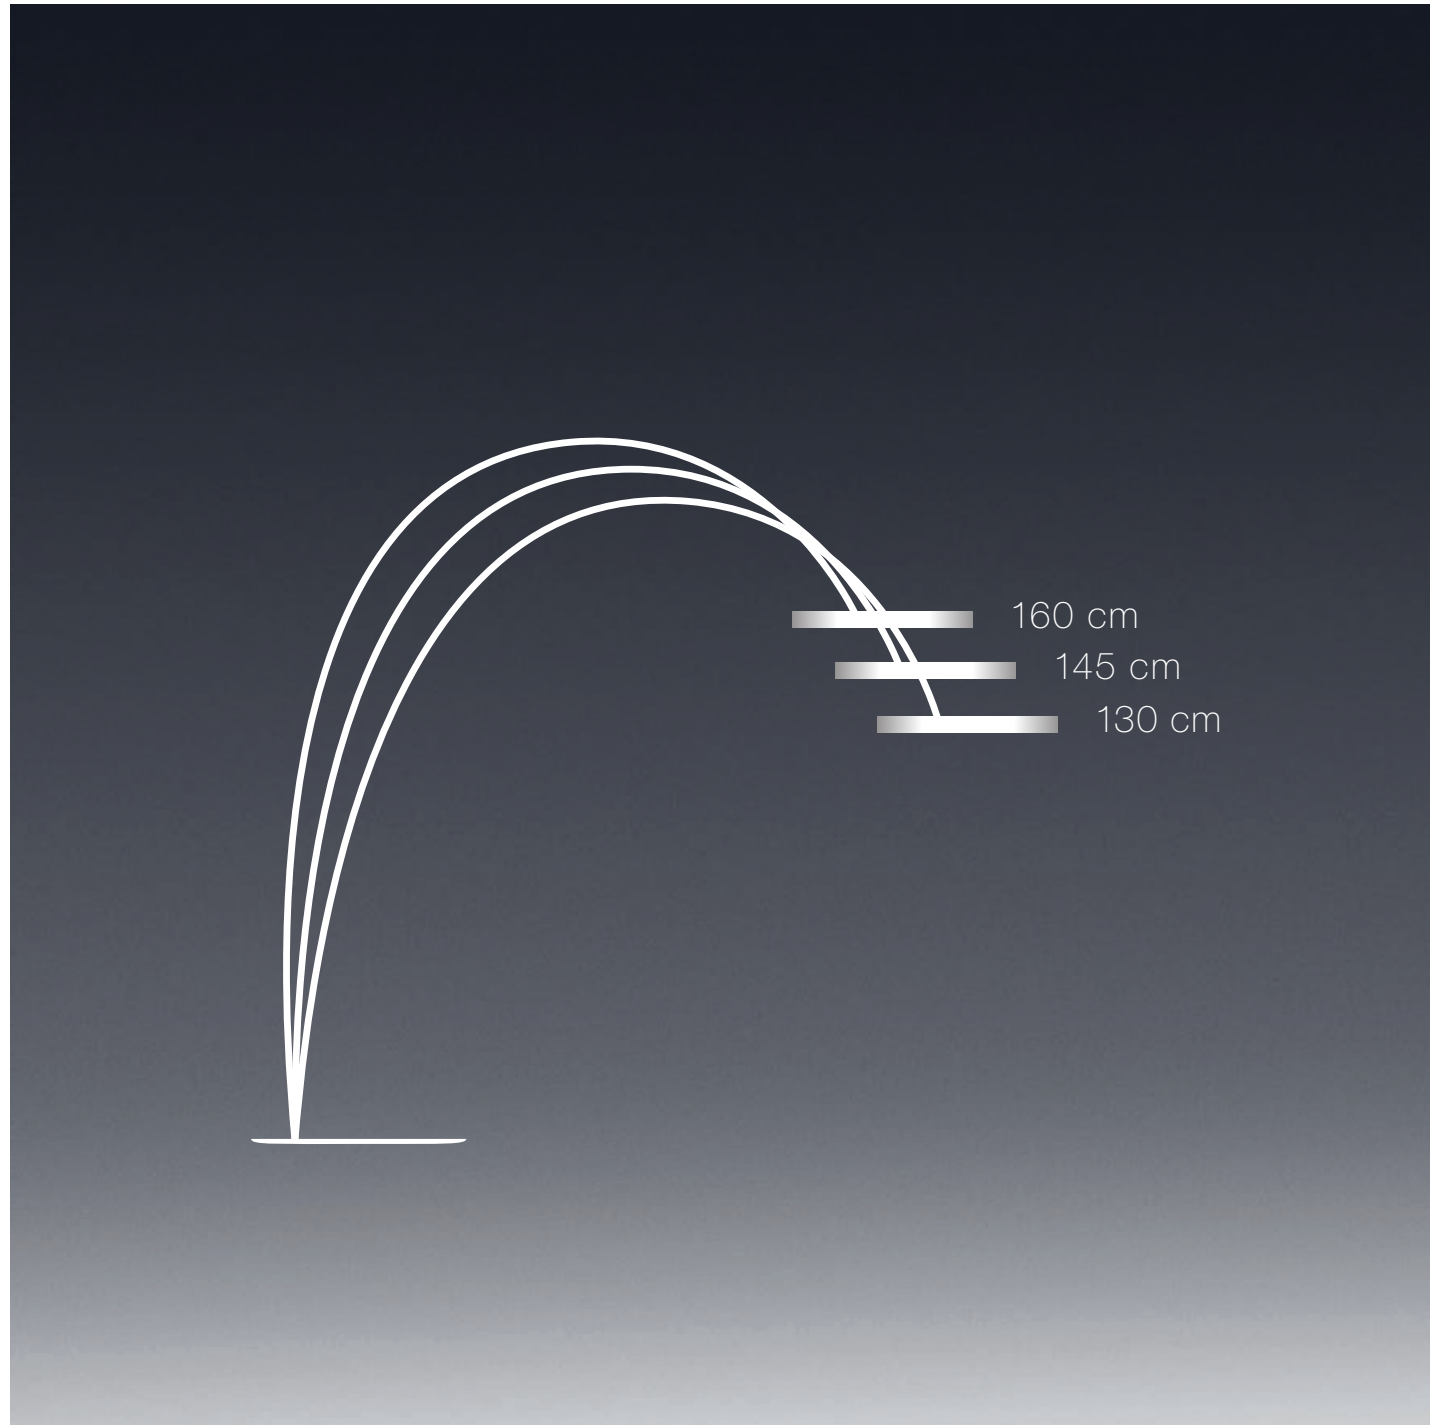

Mito largo  
surface bronze

## Mito largo

height adjustment

Weightless, sensual, elegant: the ring-shaped head floats on the conical, minimalist carbon body. Thanks to a simple mechanism, the luminaire head can be set to three heights. Whether it is placed in a lounge, a sitting area in a living room or above a dining table: Mito largo is the perfect choice.

**height adjustment** – depending on the application or table height, the head of Mito largo can be adjusted in three steps to 130 cm, 145 cm or 160 cm during assembly.

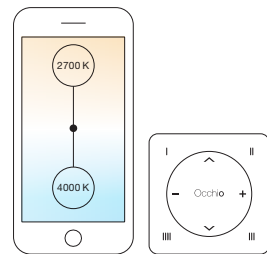

## Mito largo

### features

Magic moments: With Occhio »touchless control« Mito largo can be controlled as if by magic. Simple gestures are all it takes for Mito largo to fade from uplight to downlight and even change the color temperature.

**Occhio air** – intuitive  
Bluetooth control (included)

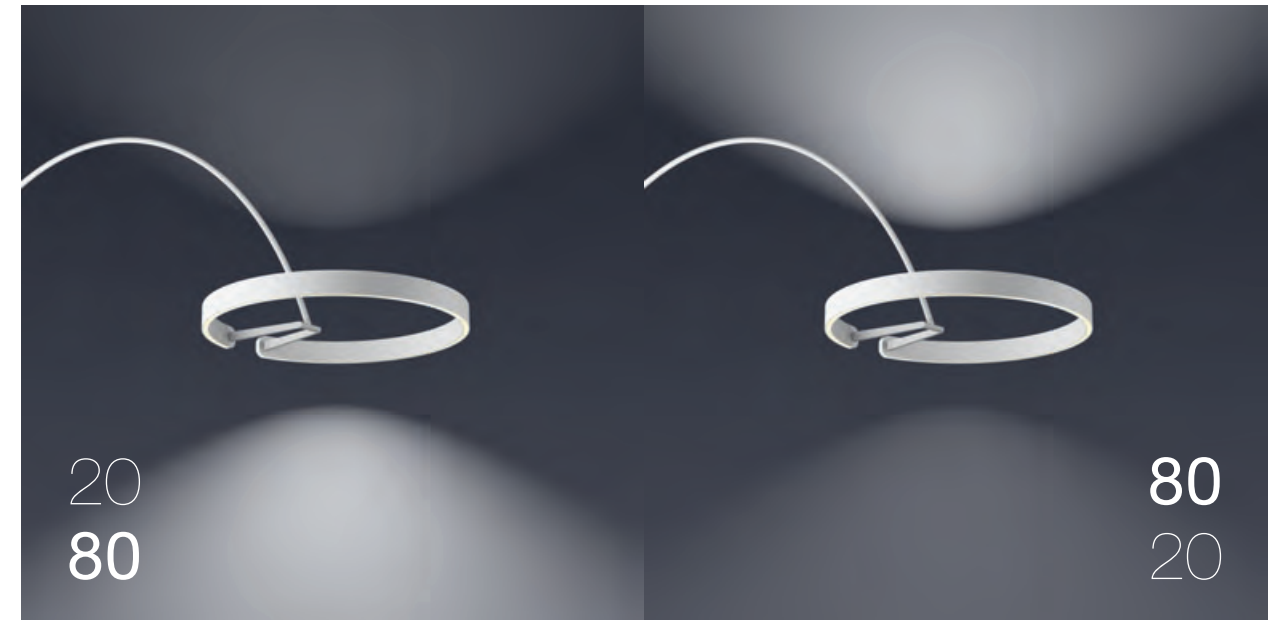

smartphone

controller

## Mito volo

height adjustment

With its unique height adjustment feature Mito volo can be easily and comfortably set with one hand and thus precisely adjusted in height. Whether wide or focused – the height adjustment allows you to adapt the lighting effect to your particular situation. A sophisticated reel mechanism ensures that Mito volo always remains horizontal at any desired height.

**height adjustment** – the pendant length can be continuously adjusted between 65 cm and 165 cm with an optional height adjustment feature. As they move, the cables disappear into the canopy.

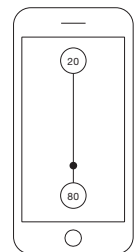

## Mito volo

### features

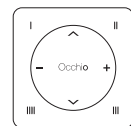

Mito volo's full talent shines through when you interact with it: the powerful light is controlled intuitively and almost magically by gesture on the luminaire head – or by Occhio air. The intensity of the light can be changed independently on both sides, or with an impressive effect it can be infinitely varied up and down. The color temperature can be adjusted at any time. Mito volo offers fascinating possibilities for staging – and the play with light can begin!

**Occhio air** – intuitive  
Bluetooth control (optional)

smartphone

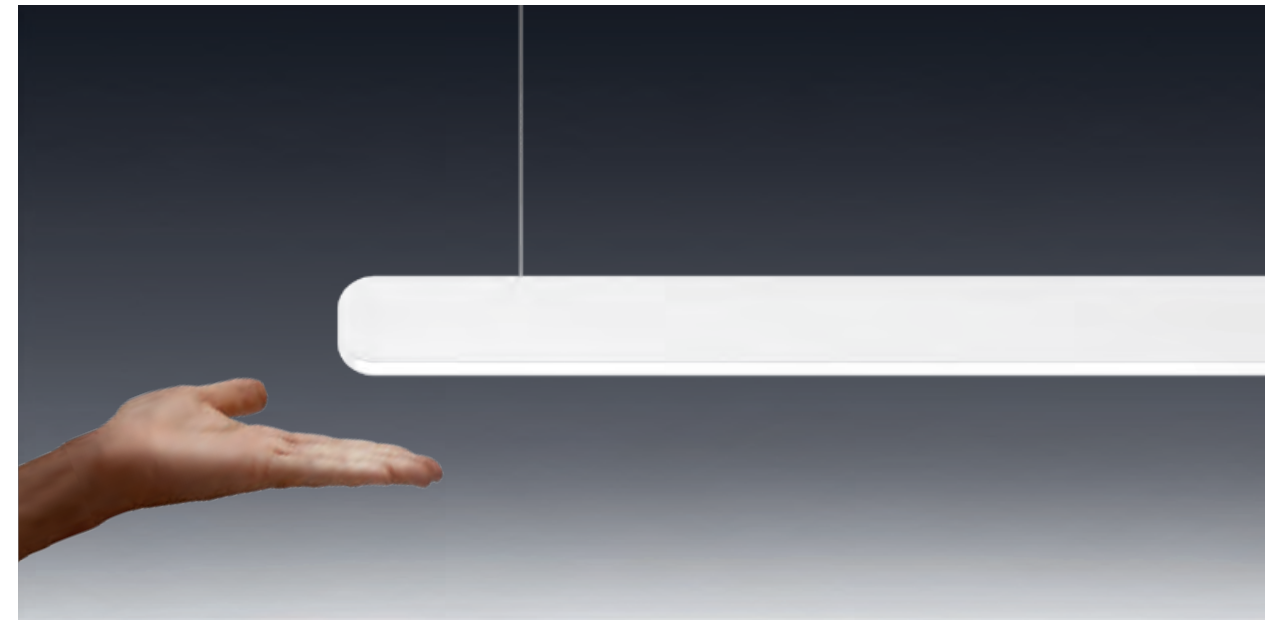

controller

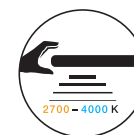

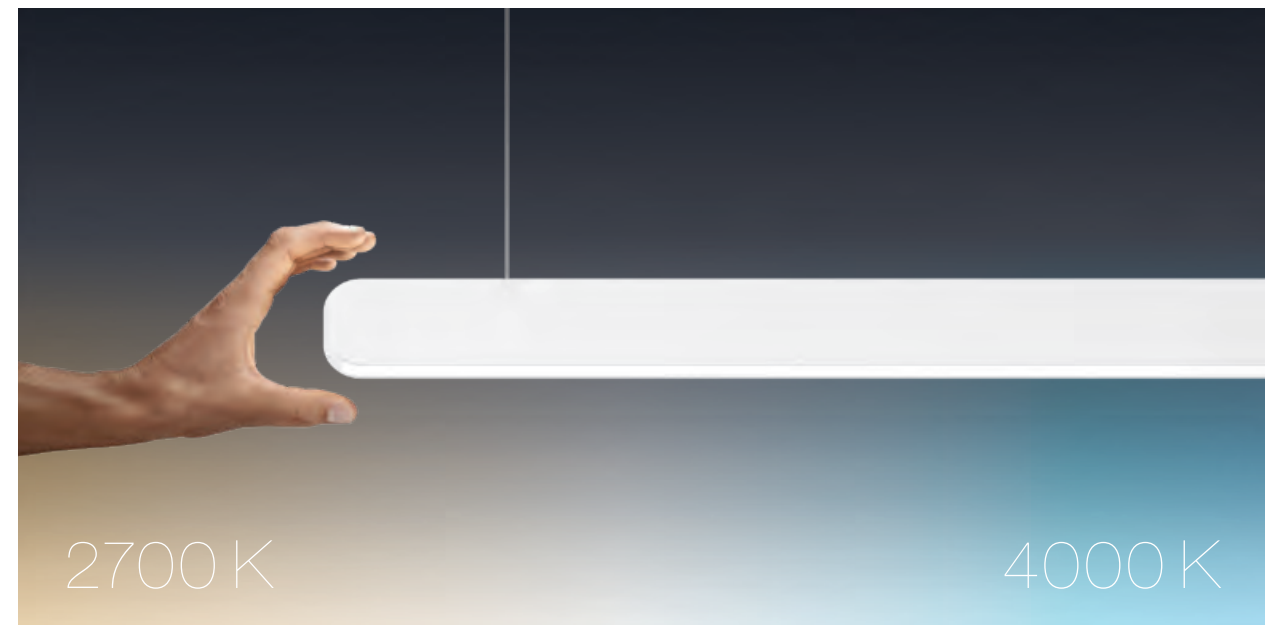

**up/down fading** – a unique feature: Via »touchless control« or Occhio air, the full luminous power can be continuously drawn from one side to the other.

**two in one** – Mito volo is equipped with two LED strings. The uplight and downlight can thereby be operated independently of each other.

**touchless control** – thanks to sensors integrated invisibly at the ends, Mito volo can be controlled with simple gestures – contact-free and intuitive. Depending on the application, gesture control can also be deactivated.

**color tune** – with a simple gesture or Occhio air you can adjust the color temperature of Mito volo according to the situation. From warm light tones of 2700 K to cooler, stimulating light of 4000 K. A fixed, preset light color is also possible.

lens optics – narrow (ca. 25°)

table

riffle optics – flood (ca. 100°)  
lens optics – wide (ca. 80°)

The precisely manufactured lens optics from Mito linear integrated into the profile provide powerful, directional light with the best possible freedom from glare. The rippled structure of the cover fuses the individual lenses into an exciting linear structure while at the same time creating a homogenous lighting effect.

# Mito alto

Minimalistic on the outside, revolutionary on the inside

Mito alto flat 100  
surfaces matt white

## Mito alto

### features

With its glare-free lens optics, its various lengths, versions and surfaces, Mito alto can be used in a variety of combinations – and thus offers completely new possibilities for lighting design. Thanks to an integrated power supply unit, the up versions can also be mounted directly on fixed ceilings. With »color tune« you become the lighting designer of your surroundings – it allows you to preset the color temperature of Mito alto or change it with Occhio air at any time.

#### mounting options (included)

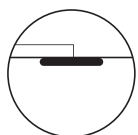

inlay (flat / up)

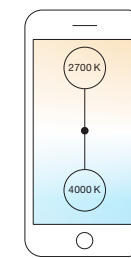

»air« inlay with antenna flap  
(up)

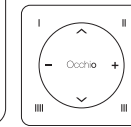

cover for ceiling box (flat / up)

**plug & play** – the integrated driver in the alto up version makes working with light as easy as in the days of the light bulb: the technology can be used without an external power supply unit and enables an exceptionally pure and minimalistic design.

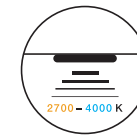

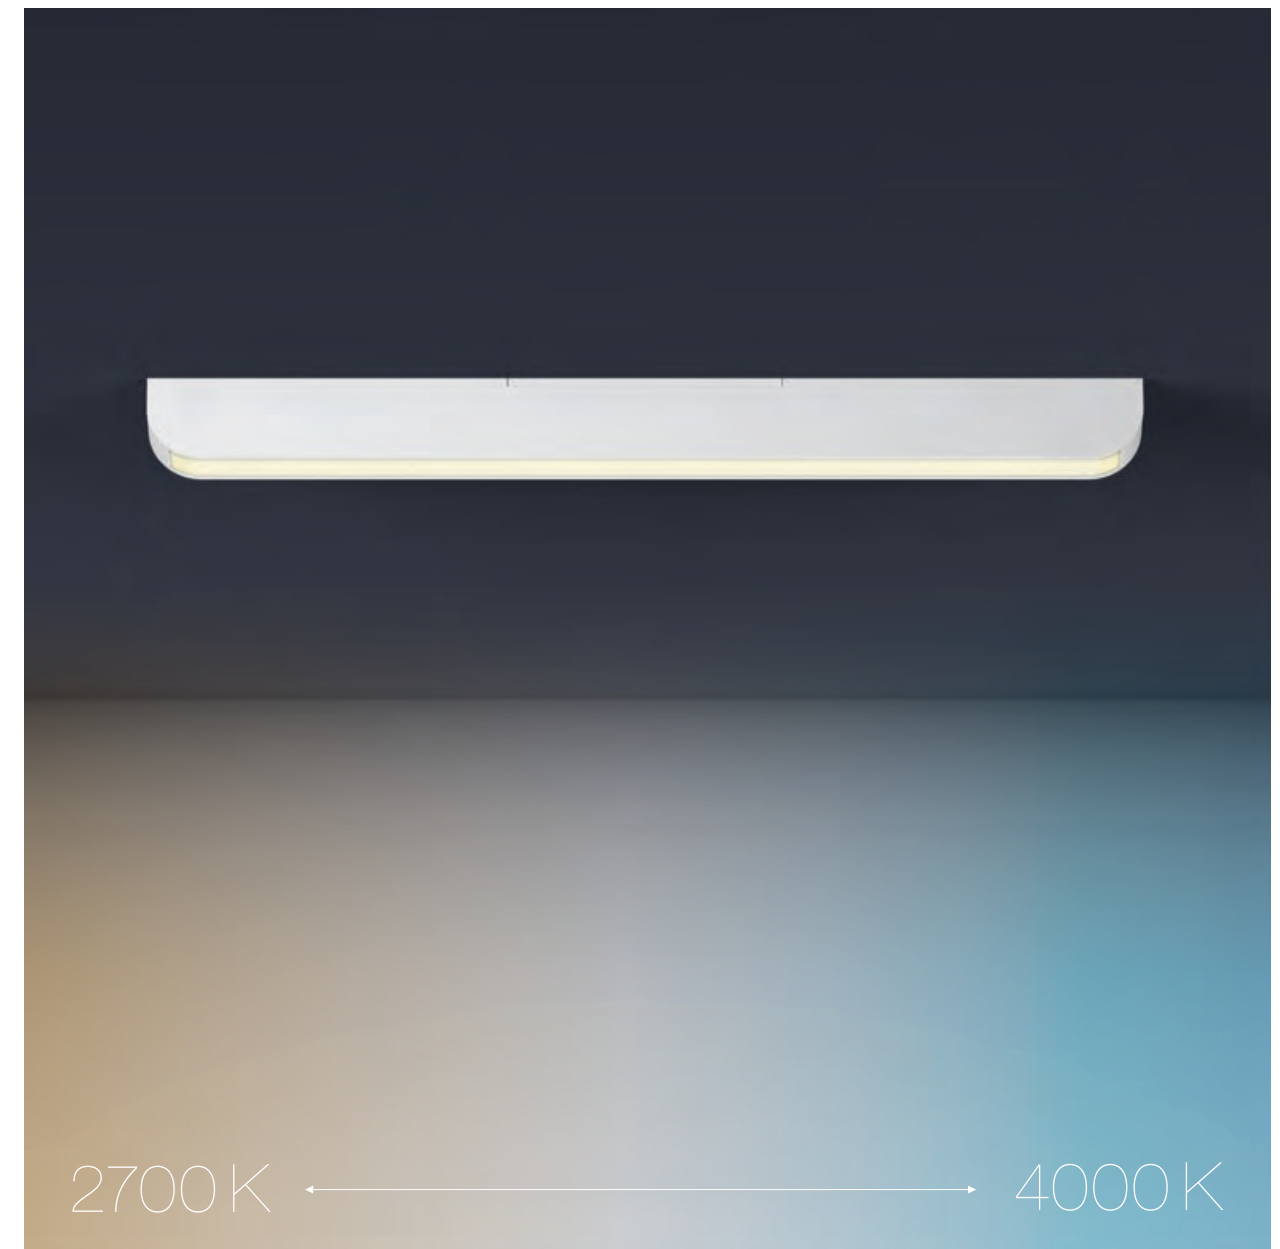

smartphone

controller

**Occhio air** – intuitive  
Bluetooth control (optional)

**color tune** – with this feature you can select the light color or change it with Occhio air (optional) at any time. From warm light tones with 2700 K to cooler, stimulating light with 4000 K, depending on your individual wishes and application.

## Mito alto

lighting effects – one-sided

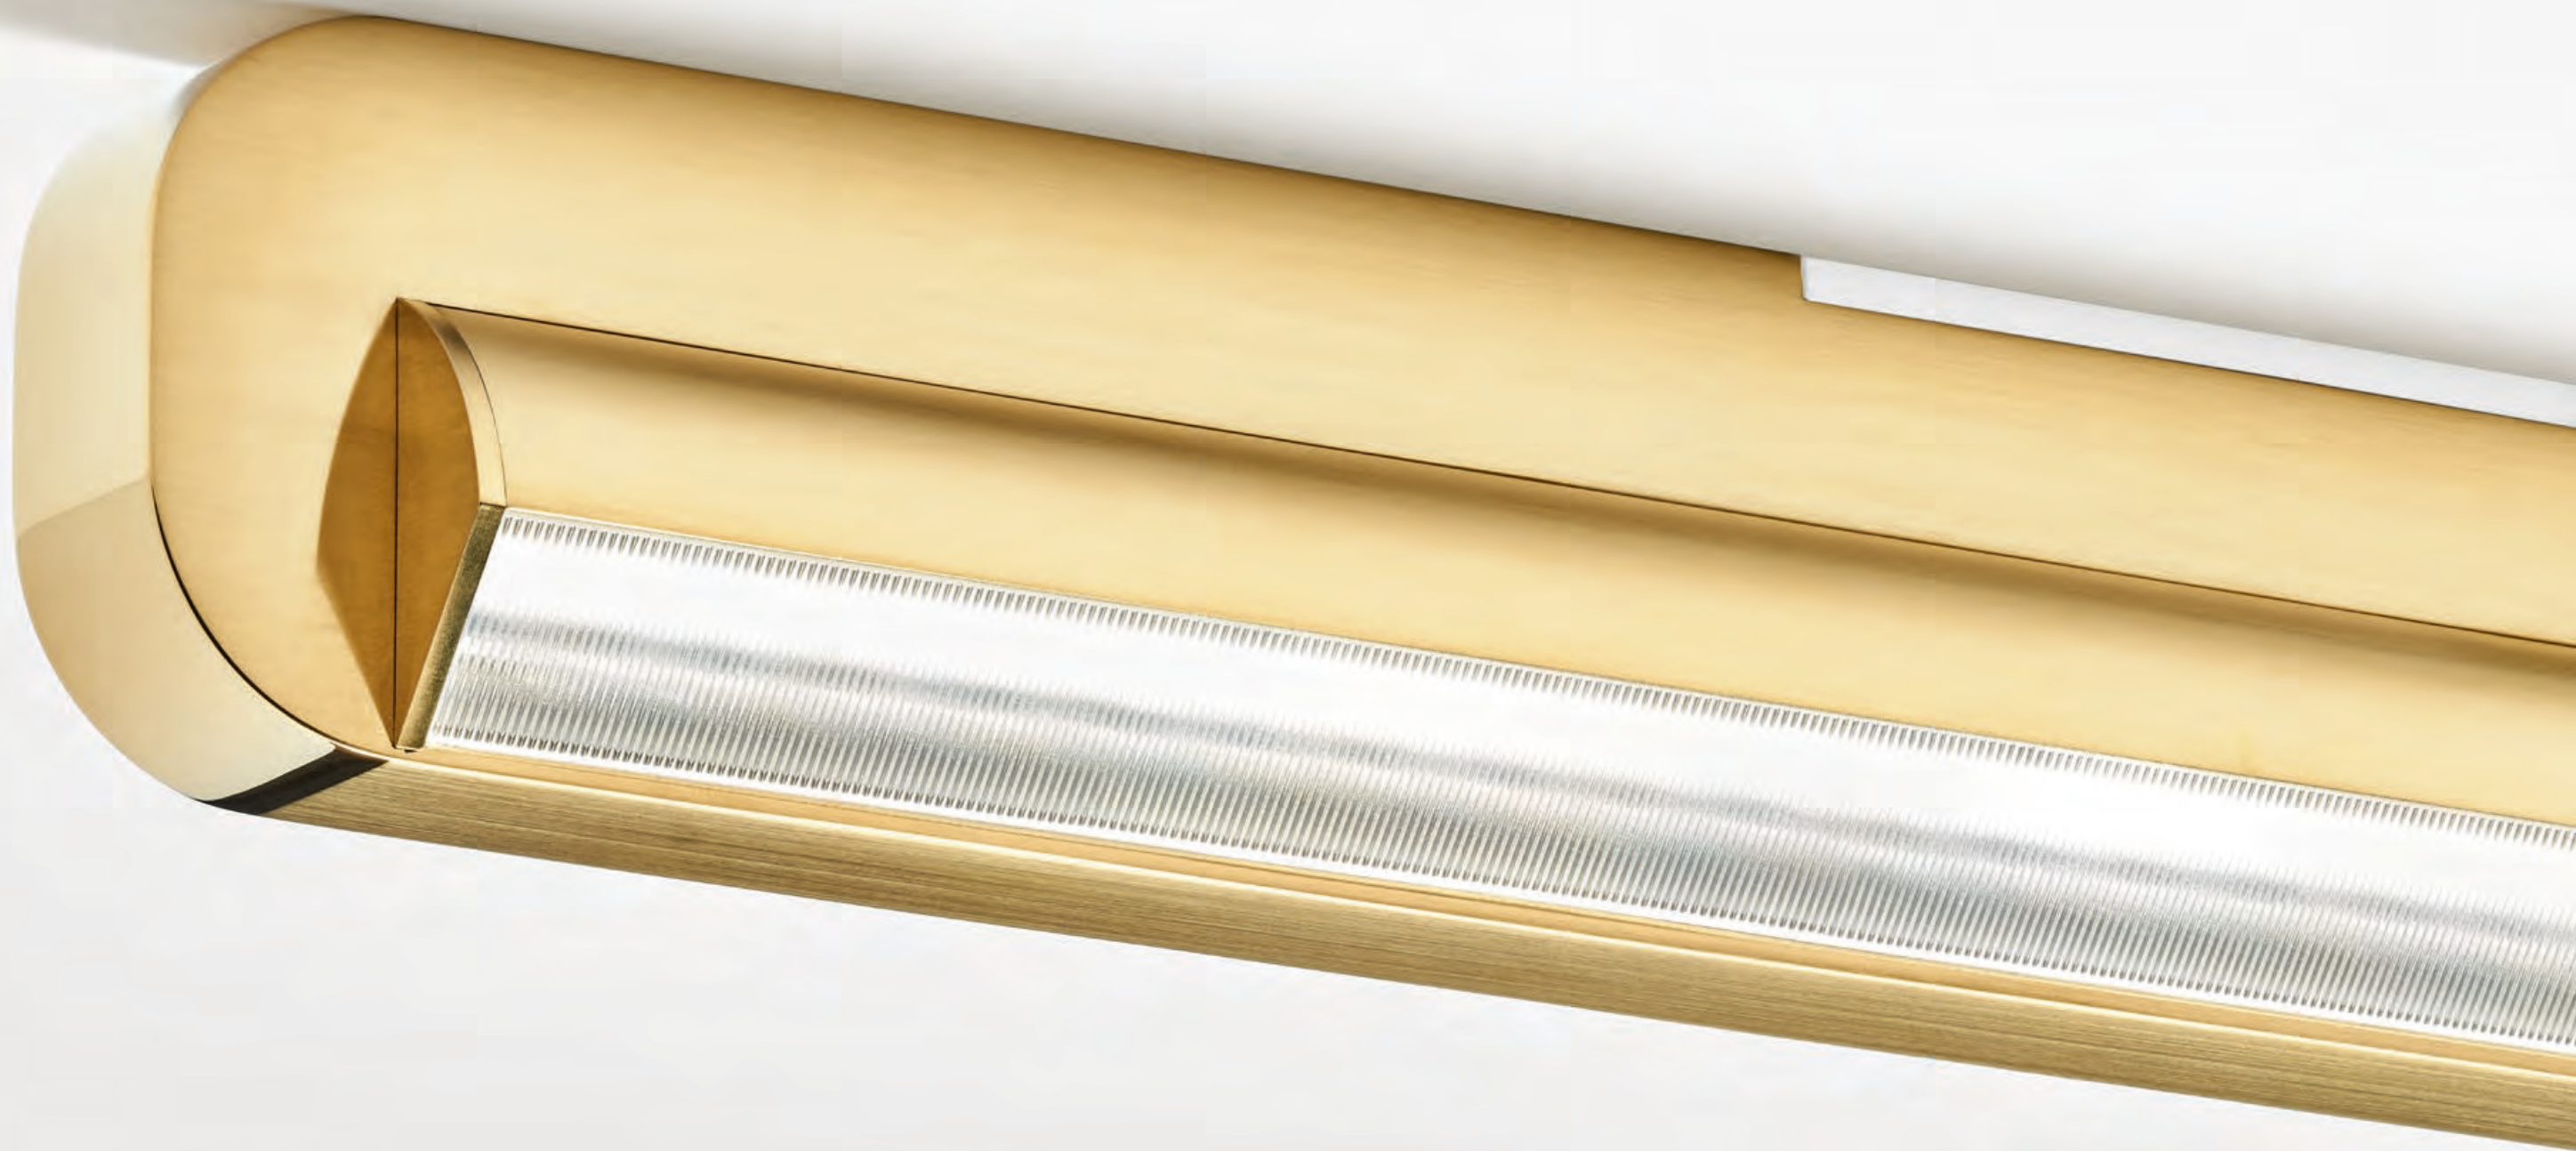

lens optics – narrow (ca. 25°)

lens optics – wide (ca. 80°)

The precisely calculated lens optics from Mito alto that are integrated into the profile ensure powerful, directional light with the best possible freedom from glare. The corrugated structure of the cover allows the individual lenses to merge linearly while at the same time creating a homogenous lighting effect.

# Mito alto side

Puristic design element and innovative lighting tool – the minimalist wallwasher opens up new possibilities in lighting design

Mito alto side  
features

With its sophisticated, asymmetrical wallwash-optics Mito alto side enables a homogeneous architectural illumination of surfaces. An integrated power supply unit allows that it can also be mounted directly on fixed ceilings. With »color tune« Mito alto side offers the option of presetting the color temperature or changing it with Occhio air as required at any time, even in combination with other Mito luminaires.

# Mito terra

A new era in workplace lighting – innovative features and optimum lighting comfort combined in pure elegance

Design Axel Meise

Mito terra 190  
surface matt black

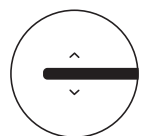

Mito terra 3d  
surface rose gold

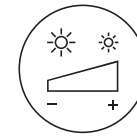

## Mito terra

### features

For Mito terra light quality and function are at the forefront – ensuring an optimum working atmosphere. Thanks to its different height options, Mito terra works for single, double or height adjustable worktables. In addition to »touchless control« and Occhio air, Mito terra adapts to the needs of the user on request thanks to »presence sensor« and »ambient light control«.

**height adjustment** – thanks to an invisibly integrated gas pressure spring, Mito terra var is height adjustable and can adapt on request at any time – for example at height adjustable workstations.

**ambient light control** – perfect light at any time: »ambient light control« dynamically adjusts the light of Mito terra to the surrounding brightness. Depending on the time of the day and the weather, optimal lighting conditions are constantly ensured.

**presence sensor** – light is not only controlled by gesture or Occhio air. The »presence sensor« responds to presence or absence and switches the light on or off automatically – and efficiently.

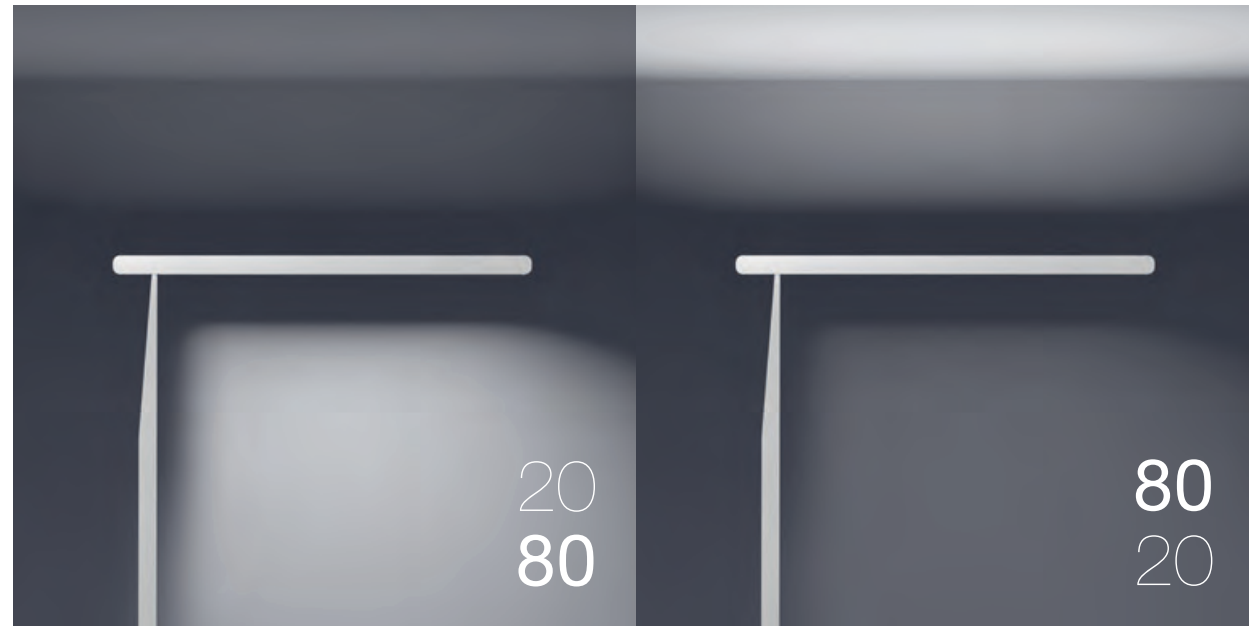

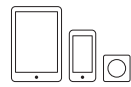

## Mito terra

### features

**Occhio air** – intuitive  
Bluetooth control (included)

**up/down fading** – a unique feature: Via »touchless control«, »body sensor« or Occhio air, the full luminous power can be drawn from one side to the other.

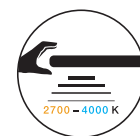

**two in one** – Mito terra offers double-sided light output with its two LEDs. The uplight and downlight can thereby be operated independently of each other.

**body sensor** – in addition to the control on the luminaire head, the light can also be regulated on the body via »body sensor«. This facilitates in particular the handling in the workplace.

**touchless control** – with the help of »touchless control«, Mito terra near a user's hand can be controlled with a simple gesture – touchlessly and intuitively thanks to innovative infrared sensors. Depending on the situation, gesture control can also be deactivated.

**color tune** – with this feature, you can select the light color at any time according to your wishes and application, from warm light tones with 2700 K to cooler, stimulating light with 4000 K. A fixed light color setting is also possible.

## Occhio air

We put the light in your hands

With the Bluetooth-based Occhio air control system you can control the light simply and intuitively – from anywhere, independent of any home automation system. All luminaires can be operated via tablet, smartphone or controller. Change the atmosphere of your surrounding with a single touch: Dealing with light becomes a playful pleasure.

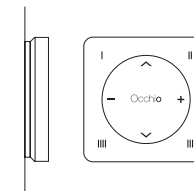

## app

A completely new dimension of ease of use: With Occhio air you can control your lights individually or in groups. The Occhio air app is free of charge in the App store or in Google Play. It can be downloaded on tablets or smartphones.

## controller

With the Occhio air controller you can operate luminaires and create moods in a room without using an app – at any time and anywhere in the room. The controller is available in four colors as a mobile table version or with a magnetic wall mount (optional).

## DALI box

Mito can now also be controlled via DALI which can be integrated and upgraded into almost all Mito ceiling and pendant luminaires. The DALI box is used instead of the Occhio air or set box. Mito can thus be switched and dimmed via DALI. Also the color temperature can be adjusted via DALI. Further information can be found at [www.occhio.com/dali](http://www.occhio.com/dali).
