

Occhio

Occhio+ is expanding the Occhio product portfolio to include versions specifically relevant for the project segment – and therefore taps into Occhio's full potential of holistic lighting design in private and commercial projects.

Occhio air plus enhances the Bluetooth-based control Occhio air to include functions that are particularly relevant for professional applications such as motion detectors, lighting automation and controlling larger networks from a distance. At the same time, it creates new opportunities when connecting with DALI systems.

motion detectors – external building control – Occhio air / DALI communication

Occhio air plus – sync

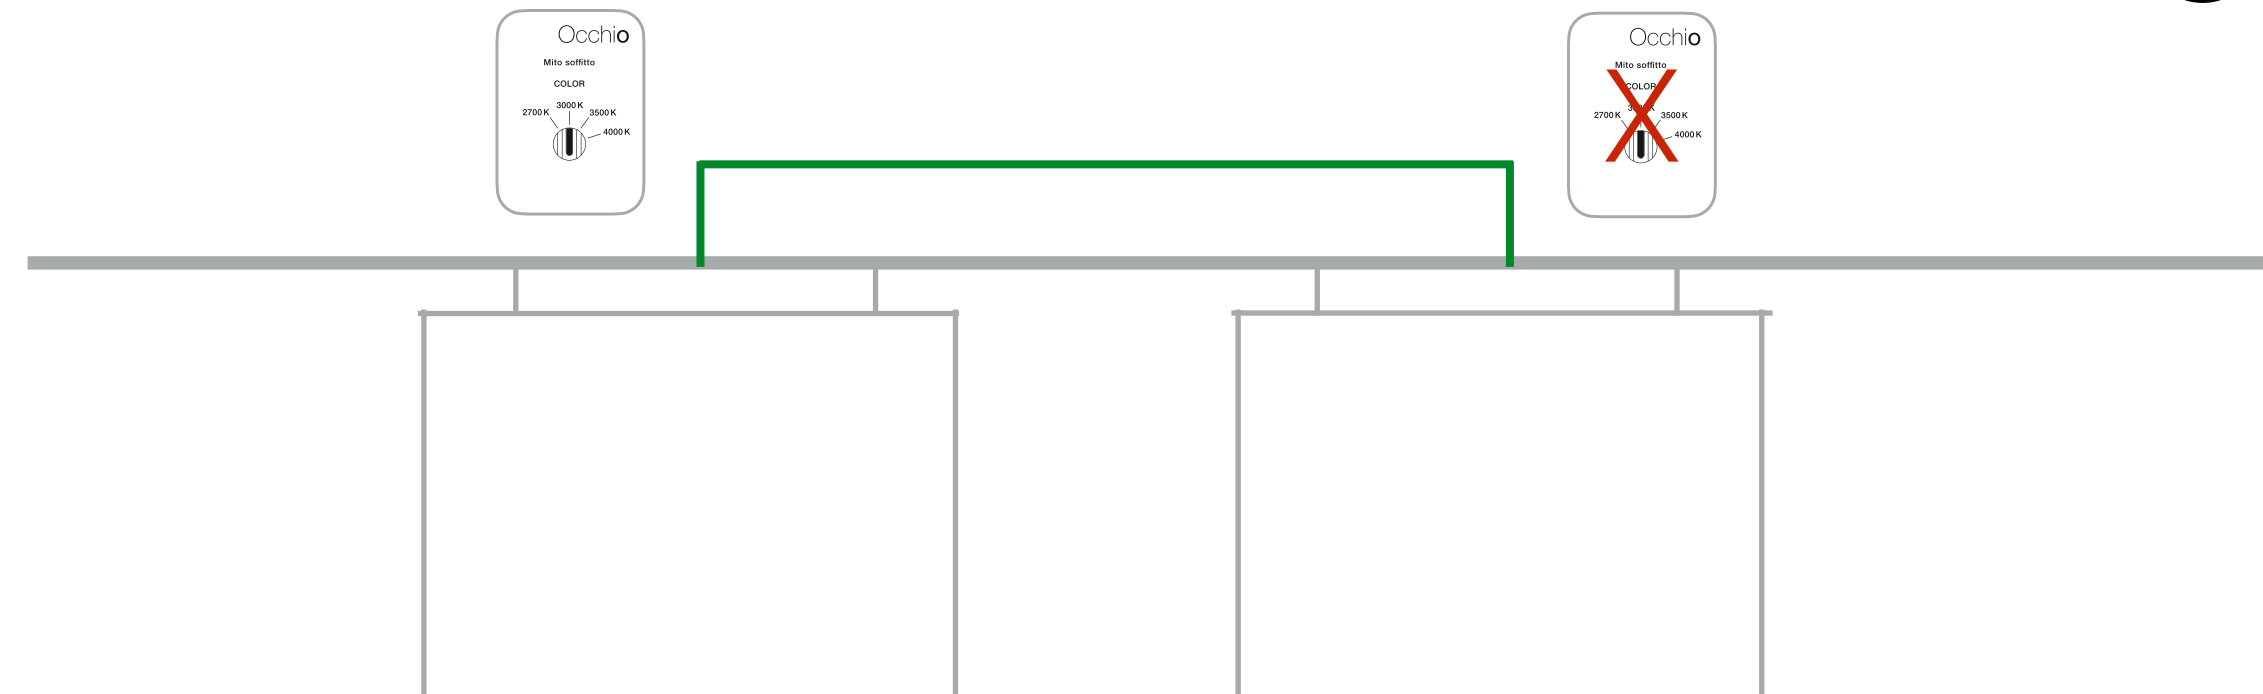

synchronization between luminaires

With this feature, »air« luminaires with gesture control can now be synchronized together without having to install a control line.

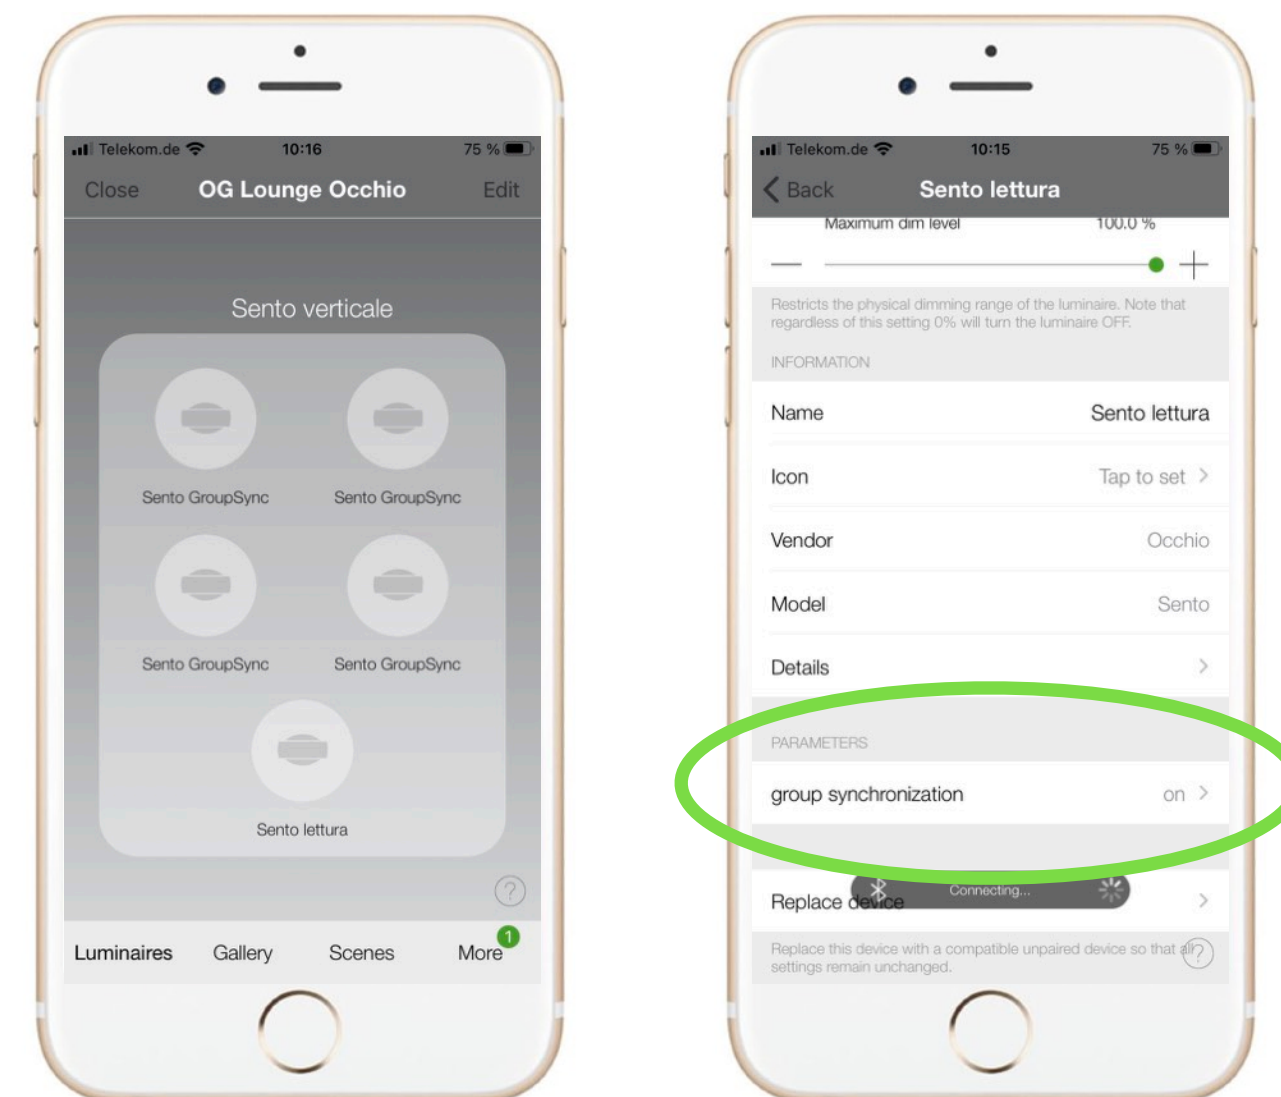

available:

- Sento from combination head on (since mid 2020)
- Mito from Q1-2021

Occhio

until now: synchronization with cable

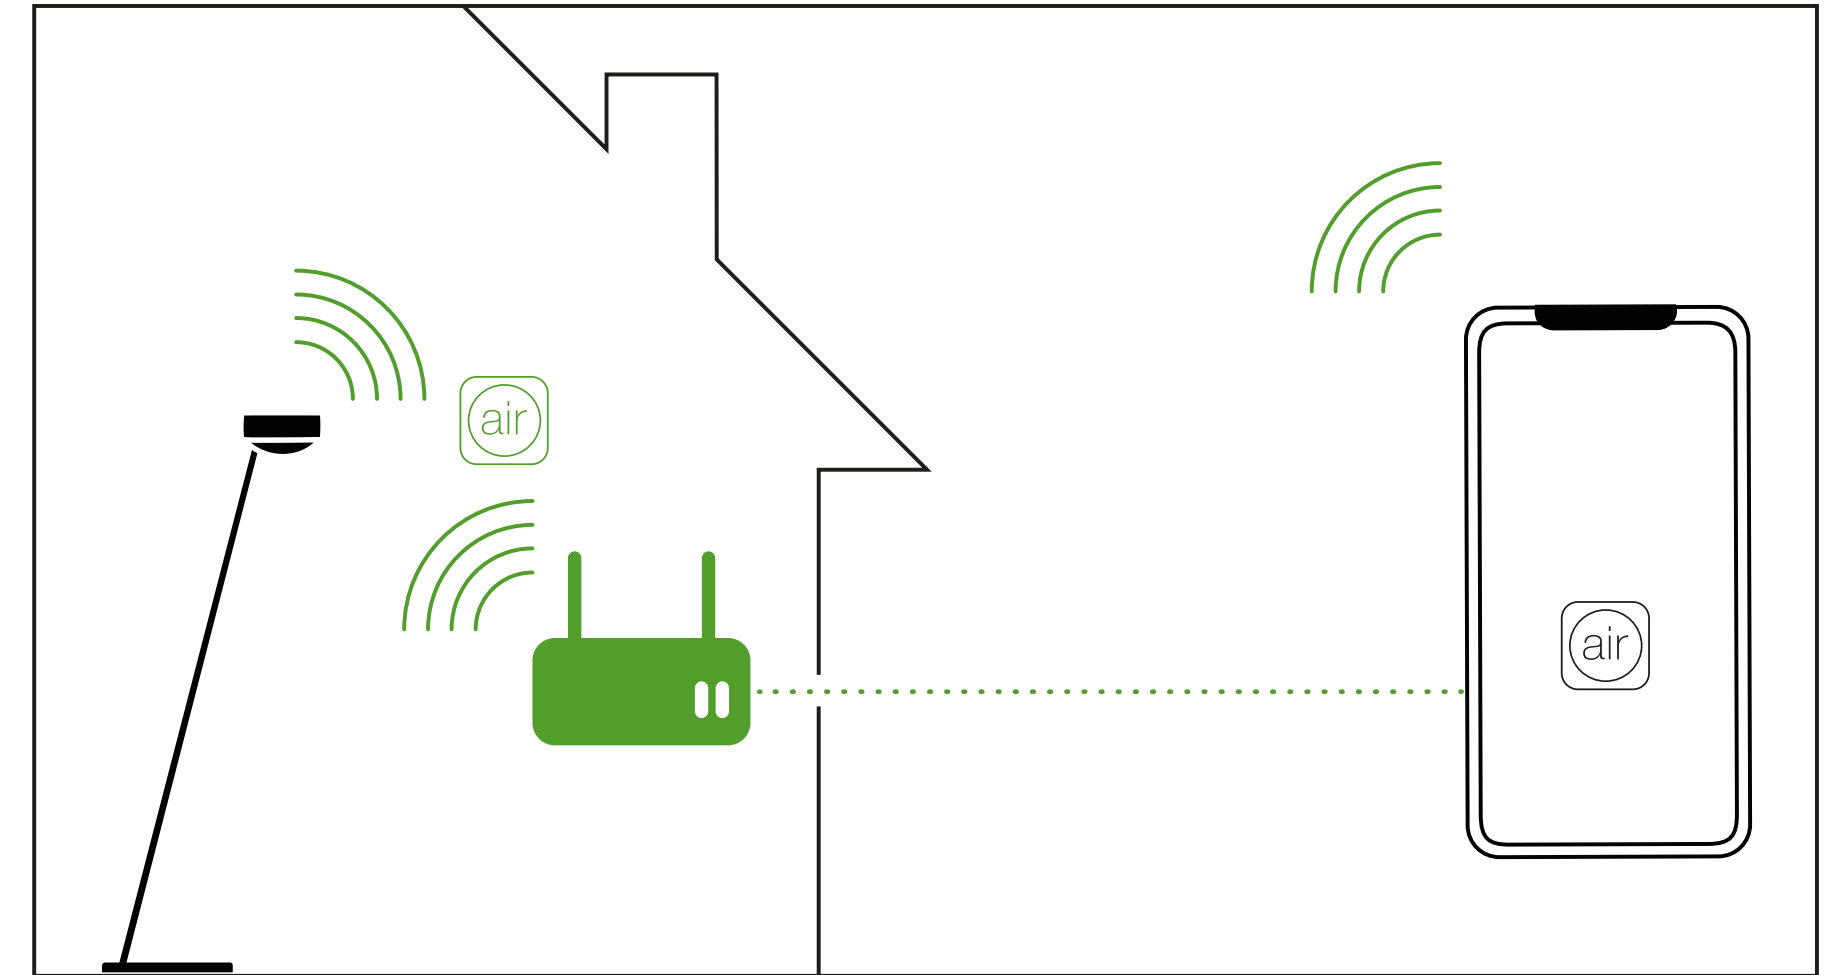

new: synchronization with Occhio air

Occhio air plus – remote control

remotely control of the »air« luminaires

- gateway integrated into network and installed at network location
- ideal for access from a distance, especially for vacation homes

- available: directly via the manufacturer holders components (BLE gateway)

Occhio

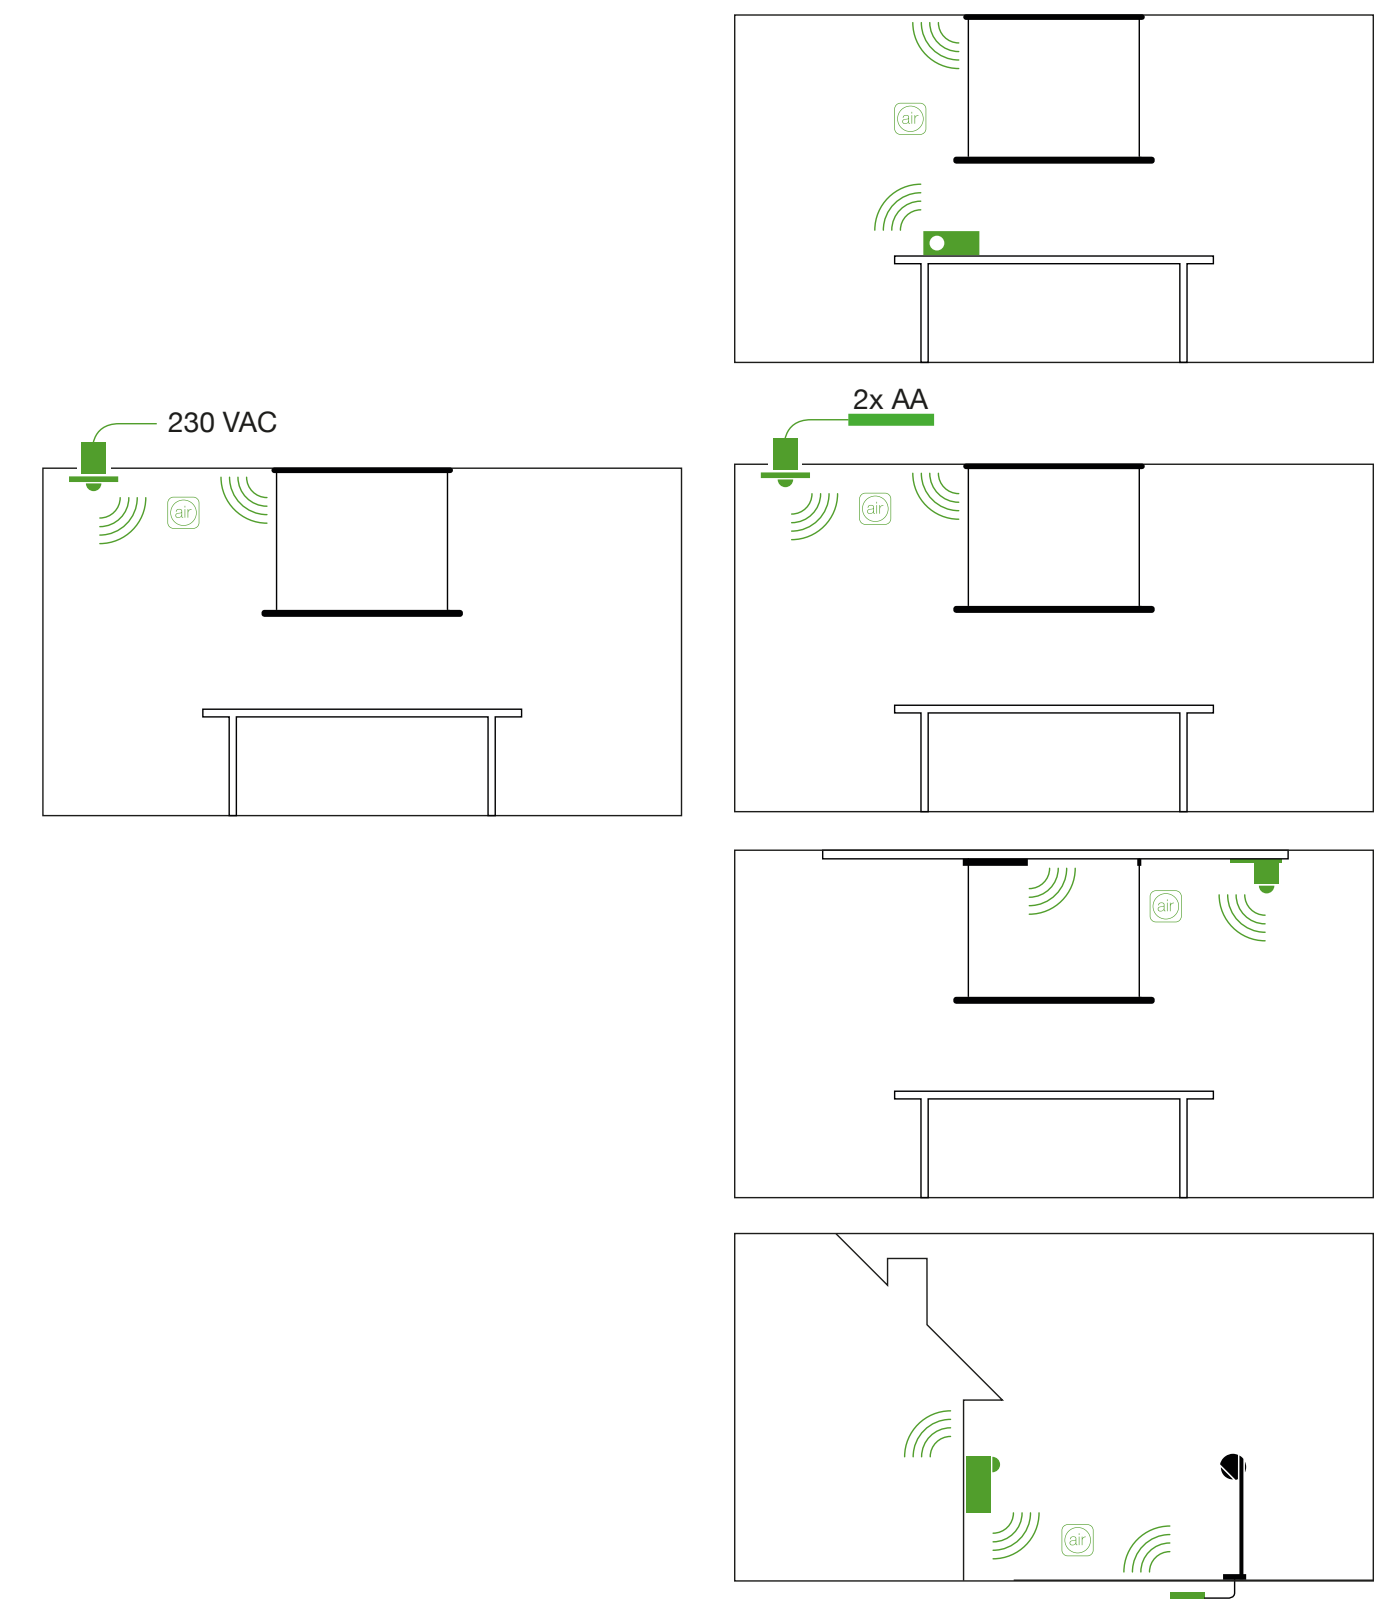

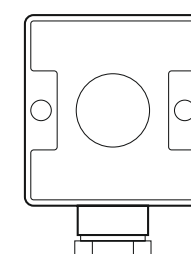

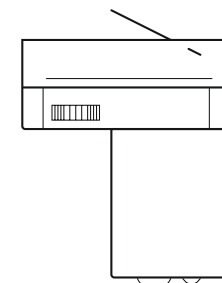

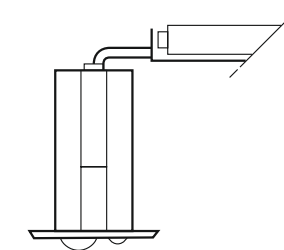

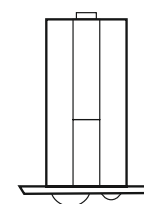

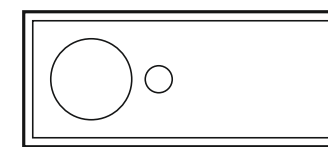

Occhio+ control – sensoric

Occhio

Motion detector (with presence and brightness sensor)

available as

- cube for free placement in the room, battery operated
- recessed version with 230V connection or battery operated
- track version for 3-phase track
- surface-mounted version for outdoor with 230V connection
- **available: January 2021 from stock**

cube version

recessed version

track version

Occhio+ control – DALI compatibility

A module to easily integrate DALI dimmable luminaires or power supply units into Occhio air

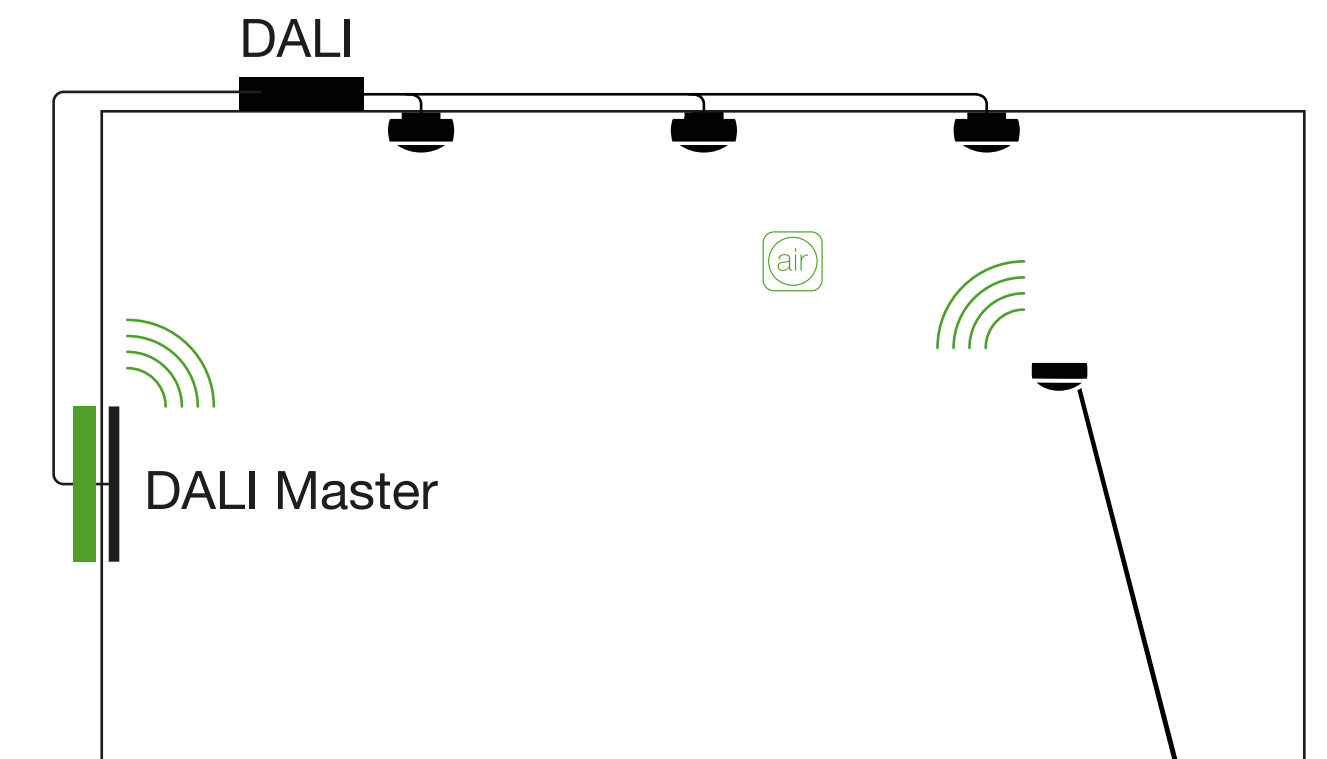

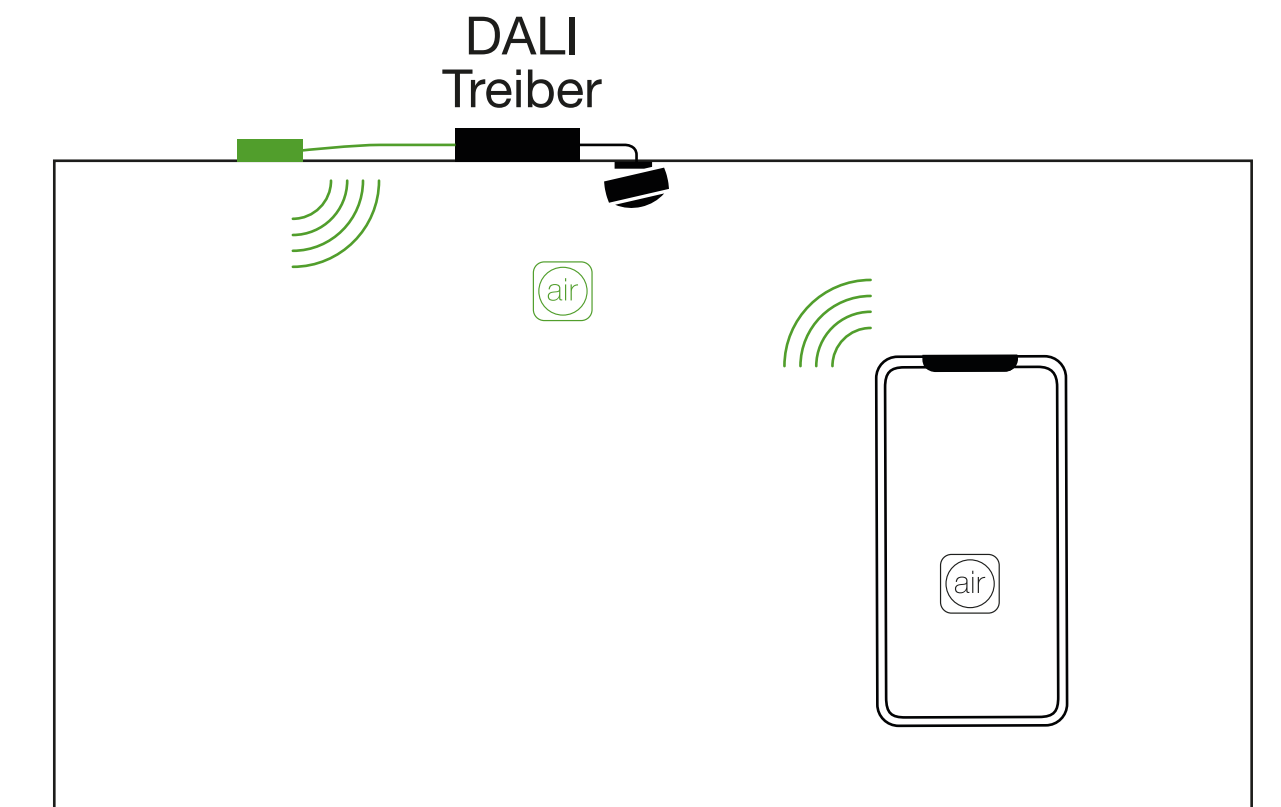

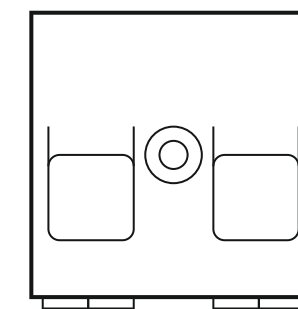

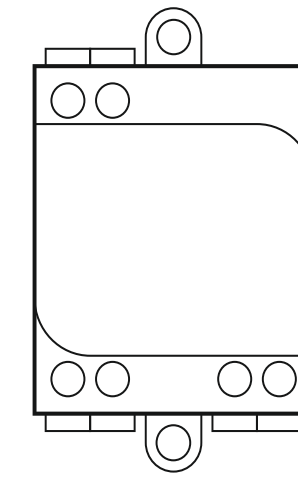

- »air« module DALI

or Occhio air luminaires can now also be controlled via DALI

- DALI gateway for Occhio air

- available: January 2021 from stock

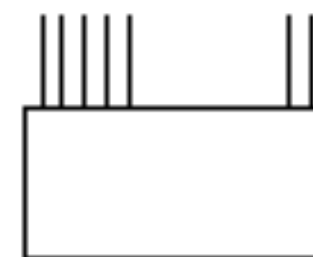

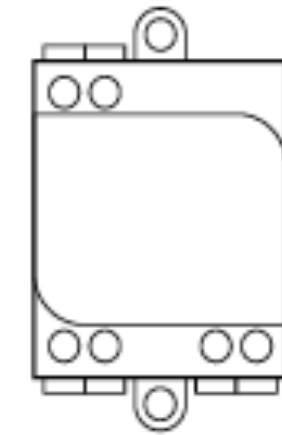

Occhio

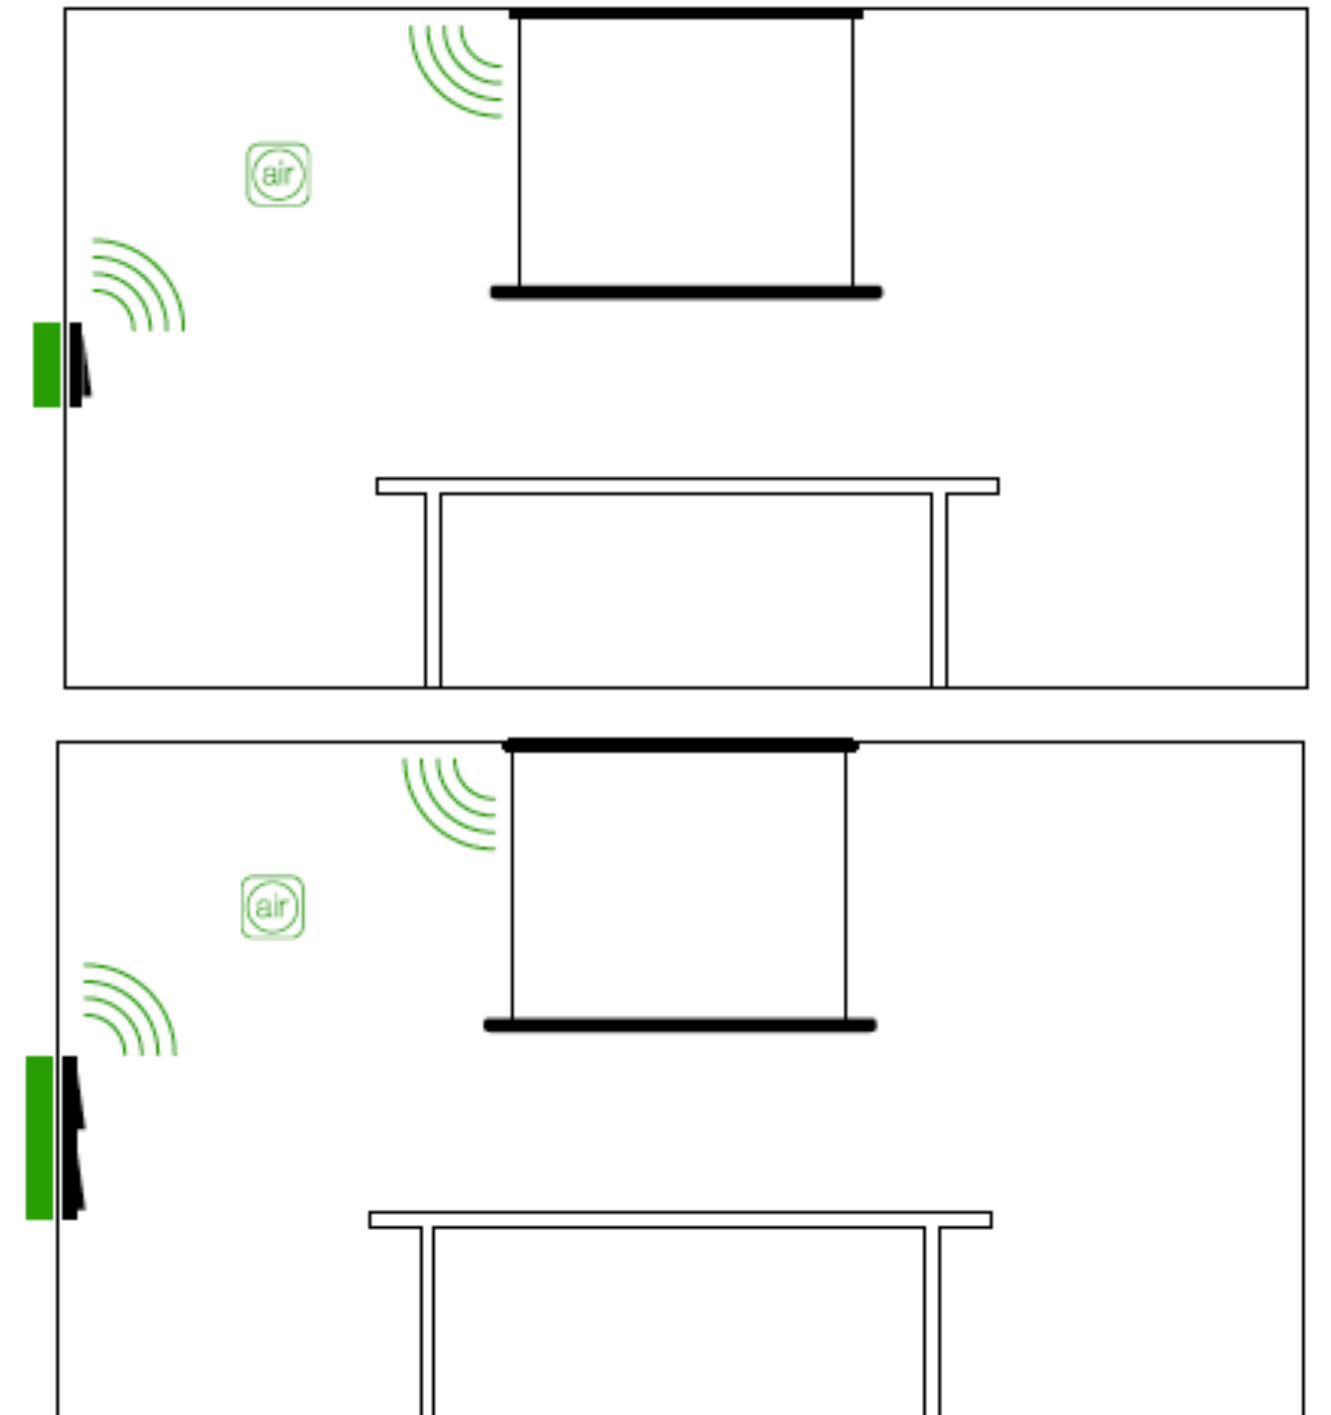

Occhio air plus – push button modules

Two modules to control Occhio air lights and recall scenes via wall switches with one or four buttons

- Single push button for Occhio air
- Quadruple push button for Occhio air
- available: from January 2021
