

Occhio

a new culture of light

We are fascinated by the idea of allowing people to shape the lightscapes of their personal space, using light to enhance their quality of life.

live your individuality

Individuality requires free space. A perfectly calibrated interplay of light and dark, of diffuse and focused, of direct and indirect light gives character to rooms. And because the requirements for light can change depending on the situation, Occhio's modular luminaire systems offer outstanding freedom of design – always in keeping with the highest quality of light and a holistic design concept.

Sento verticale, Sento lettura rose gold

create something extraordinary

Our benchmark for perfect light is sunlight. At home or in the work environment: Occhio's exceptional quality of light provides the right light for every situation. Precise, glare-free optics represent the ultimate in lighting comfort. And with the Mito series, »color tune« allows the color temperature to be adjusted from atmospheric warm light to energizing cool light – the entire spectrum of light to let your creativity unfold.

Mito terra 3d rose gold

feel the ease

At Occhio, operating the luminaires becomes a true experience. With »touchless control«, it only takes an intuitive gesture to turn a luminaire on or off, dim it, direct it upward or downward, or change the light color. As an alternative, you can operate the luminaires by using an app or a controller. Occhio air can control individual luminaires or arrange entire lighting scenes easily and comfortably.

enjoy beauty

At Occhio, beauty and quality are visible in the design of the luminaires as well as in workmanship, surface finishes – and intuitive functions. The passionate commitment to aesthetics, attention to detail and a holistic way of thinking perfectly accentuate the harmony of the interior design, in terms of both – look and function.

Mito largo bronze, Mito soffitto rose gold

Mito largo

The perfect balance between
purism and extravagance

Mito largo bronze

Individuality is not just a matter of aesthetics

... but also of possibilities. Mito largo not only underscores your sense of extraordinary aesthetics, it can also be precisely adjusted to your individual situation.

height adjustment

Passion for function

Via gesture control, »body sensor«, Occhio air or preset – with »color tune«, you can determine which color temperature you would like. Whether you opt for warm light tones for a relaxing evening or stimulating, cooler light to get your work done. With Mito, it is your choice – at any time.

up/down fading

Sense of
atmosphere

Mito raggio rose gold

Mito sospeso

Room for great ideas

It has to be technically perfect . . .

Thanks to the sophisticated reel mechanism, the pendant length of Mito sospeso can be adjusted whenever necessary. A slight nudge upward or a gentle push downward moves the luminaire to the desired height – and it remains balanced at all times.

height adjustment (optionally available for all pendant luminaires)

. . . to be simple

Mito sospeso 60 rose gold

Mito sospeso 40 matt gold

touchless control

The magic of touch

One gesture is all it takes: With Occhio »touchless control«, light can be switched, dimmed and faded upward or downward with simple movements of the hand. All without switches, dimmers and the like.

Mito soffitto

Sense and sensuality ...

... in perfect harmony

color tune

It's nice to have the choice

Via Occhio air or preset – with »color tune« you can determine which color temperature you'd like. Whether you opt for warm light tones for a relaxing evening or stimulating, cooler light to get your work done. With Mito, it is your choice – at any time.

Mito soffitto 20, 40, 60 matt black

Mito linear

Linearity is a matter
of personality

Simple. Spectacular.

Mito volo reinterprets the idea of suspended luminaires in a completely new way. Radically linear, crafted down to the very last detail, continuously height adjustable, powerfully illuminating up- and downlight, intuitively controlled by gestures or an app – Mito volo is designed to create the perfect light for any situation and you can fully enjoy the atmosphere, the space and the moment.

The fourth dimension of architecture

Mito alto side expands the possibilities of lighting design with the impressive wallwash effect. Vertical surfaces are homogeneously illuminated to highlight the sense of space.

Mito alto side 70 matt gold

Mito terra 3d rose gold

A window seat when and where you want it

Mito terra produces a quality of light that could easily be compared to the sun. The subtle difference: The direction, color and intensity of the light produced by Mito terra can be controlled and perfectly set to meet your particular need. It is up to you – also when it comes to the optimal arrangement of luminaires at your workspace.

choose your light

One system – no limits

The modular body-head principle used by Sento makes it all possible: With a comprehensive range of floor-, wall-, ceiling- and suspended luminaires, you can place the luminaire head exactly where you want it. Thanks to modular exchangeable optical components such as lenses, inserts and color filters, the perfect lighting effect can be configured for any situation – now and anytime!

Always a stunning experience

»up/down fading« makes it possible: Luminaires with double sided light output enable unrestricted upward and downward direction of light in the room. That creates entirely new possibilities for changing the lighting atmosphere – anytime! The luminaires are operated by »touchless control« or Occhio air.

We put light into your hands

With the Bluetooth-based light-control system Occhio air, you can manage light simply and intuitively – from anywhere, regardless of the house automation system, you may have installed. Using a tablet, smartphone or controller, you can operate all luminaires with a simple touch. Change the atmosphere of your environment with a simple press of the button. Thanks to its easy setup, Occhio air provides you with customized design possibilities that can be modified at any time: Working with light becomes a playful pleasure.

app

A totally new dimension of operating comfort. With Occhio air, you can control single or groups of luminaires, either individually or synchronously. Or store your customized lighting scenes in order to retrieve them again with one touch.

controller

With the Occhio air controller, you can control the luminaires and the lighting mood of a room as you are used to from a classic switch – on the wall or with a mobile option. The controller is set up by using the Occhio air app. It then works completely on its own. Luminaires, groups and scenes can be controlled throughout the house with the press of a button – completely without the help of a tablet or smartphone.

Philosophy

We turn people into the
lighting designers of
their personal space

Light from Occhio represents an invitation to enjoy and feel, to create something extraordinary and to find expression in your own individuality.

With the unique, holistic philosophy of Occhio, we turn people into the lighting designers of their personal space and enhancing their quality of life with light.

Axel Meise, designer and founder of Occhio

we create
a new
culture of light

Living
